

# Discover the new business communication server

## KX-NSX2000

Business Communication Server - The heart of medium to large sized companies

### KEY FEATURES

- Full operation continues in the event of a network outage
- Remote system maintenance can be performed via a secure connection
- UC Pro integration connects multiple devices such as desktops and mobiles
- Full Multi Cell DECT system support
- Supports Mobile Phone Integration (App)

Every business has different communication needs: connecting with their customers in different ways, in different places and using a range of devices. That's why today's mobile and fragmented workforce needs a communication solution capable of meeting the demands and expectations of their clients whenever they arise.

The KX-NSX helps companies provide a great overall customer experience by delivering the next generation communication system that meets today's flexible workforce and increased customer demands. So whether you have employees that work in various locations around the office, are adding new

employees, setting up a new office, starting a help desk or setting up employees to work from home - the KX-NSX can easily adapt to your needs.
