

Earn High Marks Managing Your Paperwork

Panasonic document scanners have the speed and accuracy that education institutions demand.

Panasonic Workgroup Scanners Education Document Solutions

Be More Productive While Going Green

Tests, homework, essays...are the number of documents you deal with increasing day by day? Panasonic scanners will quickly turn these documents into data and automatically organize them for you. Converting information into data saves the hassle of searching through paper documents, and makes it easy to share information via computers and e-mail. Reducing the number of paper documents also cuts storage space needs and saves natural resources. Let a Panasonic document scanner lighten your workload and help the environment.

Space-Saving Installation

The scanner's compact design lets you place it right in the reception area or on a desktop. That means you can put it right where you want to use it.

Intelligent and Efficient Scanning

The scanner automatically detects which way the document is facing and corrects it after scanning. It can also automatically divide a document in half for scanning, to reduce time and work in image processing. It comes with software that simplifies complicated scanning processes, and greatly helps routine office chores like filing.

Panasonic ideas for life

Enjoy a New Level of Work Efficiency

Panasonic offers reliable, flexible education solutions.

Versatile and Easy to Install and Use

Compact Panasonic scanners can be installed even in tight spaces. They enhance on-campus security by scanning visitor ID badges at reception desks, and can be linked to a database to verify visitor information. In addition to an ADF (Automatic Document Feeder) for scanning a large number of documents, the optional flatbed scanner can be used to scan books.

Install in reception areas and other small spaces.

Flatbed scanning (optional).

Intelligent Image Processing

Panasonic document scanners automatically adjust their density to produce scanned data with accurate text even from documents with coloured or dense backgrounds, which are difficult to read with an OCR (Optical Character Reader). And the Multi Colour Dropout function generates data for an OMR (Optical Mark Reader) to score mark sheet tests more efficiently. This makes it much faster and easier to score large-scale examinations.

Multi Colour Dropout

Any of up to three specific colour ranges on the document can be selected as a dropout colour.

Space-Saving Compactness

By scanning and saving documents as data, you can cut down on the need for storage space. You can archive tests and drawings before returning them to students, so you can track their improvement and discover problem areas. Saving documents in data form also makes it easier to find them when you need to retrieve them, and lets you share the information with others.

Storing takes space and makes retrieval difficult.

Data requires little space and simplifies retrieval.

Panasonic offers a complete suite of communications, office productivity and networking solutions.
