

Buried Under Client Paperwork? Put a Panasonic Scanner on the Case.

Panasonic document scanners have the speed, accuracy and convenience that law offices demand.

Panasonic Mid-Volume Scanner Law Office Document Solutions

Be More Productive While Going Green

Do you handle large amounts of confidential information? Panasonic scanners will quickly turn these documents into data and automatically organize them for you. Converting information into data saves the hassle of searching through paper documents, and makes it easy to share information via computers and e-mail. Reducing the number of paper documents also cuts storage space needs and saves natural resources. Let a Panasonic document scanner lighten your workload and help the environment.

Handle Documents with Care

Our scanners feature unique "ToughFeed" transport technology. Important client documents are protected against tearing or crumpling by a sensor which controls misfeeds. This prevents rough handling to sensitive documents during the scanning process.

Intelligent and Efficient Scanning

The scanner automatically detects which way the document is facing and corrects it after scanning. It can also automatically divide a document in half for scanning, to reduce time and work in image processing. It comes with software that simplifies complicated scanning processes, and greatly helps routine office chores like filing.

Panasonic ideas for life

Enjoy a New Level of Work Efficiency

Panasonic offers reliable, flexible law office solutions.

Accurate "ToughFeed" Transport

Original "ToughFeed" transport technology detects stapled documents and stops the scanning process to protect the pages from damage. Ultrasonic sensors detect double feeding and halt the process to prevent the possibility of missing pages while scanning. And roller pressure is controlled to match paper thickness, for gentle scanning of important documents.

Stapled Document Detection

Stops the scanning process when corner staples and side staples are detected.

Ultrasonic Double-Feed Detection

Three sensors detect double feeding and stop the scanner immediately.

Compatible with Various Documents and Sizes

Panasonic document scanners can handle a variety of document types, such as business-cards and paper ranging from thin to thick sheets. Documents of various sizes can be scanned one after the other, greatly improving work efficiency. The scanner can also scan data from documents up to 100 inches in length, so you can scan long documents. The optional flatbed scanner will scan files and books directly. For security purposes, the scanner also automatically deletes scanned data from its image memory.

Flatbed scanning (optional).

Intelligent Image Processing

Panasonic document scanners automatically adjust their density to produce scanned data with accurate text even from documents such as forms and vouchers that have coloured or dense backgrounds, which are difficult to read with an OCR. They are also equipped with versatile image processing functions like data generation for automatic image orientation, automatic cropping, skew correction, and punch-hole deletion.

Multi Colour Dropout

Any of up to three specific colour ranges on the document can be selected as a dropout colour.

Automatic Image Orientation

Even when documents are set in different directions, this function detects the direction of the scanned text and automatically rotates the document into the correct direction.

Panasonic offers a complete suite of communications, office productivity and networking solutions.
