QUALITY COMMUNICATION. COST-CUTTING CAPABILITY.

PANASONIC KX-TGP600 SMART IP WIRELESS PHONE SYSTEM
THE COMPLETE WIRELESS COMMUNICATION SOLUTION

When quality is critical and cost reduction a key consideration, Panasonic’s new KX-TGP600 Smart IP wireless phone system is the ideal business communication tool. Easy to install and delivering the flexibility and reliability that are the hallmarks of Panasonic SIP technology, it represents a complete mobility solution at a very reasonable price.
There are a wide variety of handsets which are compatible with the KX-TGP600. Among those is the KX-TPA60 DECT wireless handset, offering a 1.8” colour LCD with backlight, HD wideband audio (G.722) and 500 phone book address/20 last dialled number memory. There’s also the KX-TPA65 wireless desk phone, which offers a significant advantage over ‘traditional’ desk phones, as its DECT capabilities mean no additional cabling is required when the system is being installed.

The KX-TGP600 system includes a cell station and one KX-TPA60 handset (including charger). Other handsets shown are optional.

KX-A406, WIRELESS REPEATER.

The coverage area of the base unit is approximately 300m outdoors and 50m indoors, depending on the environment. Because some users require greater coverage, the system can include an optional wireless repeater, the KX-A406, which can expand the practical communication area to around 200m indoors.

- Compatible with wideband audio
- Up to 3 units installable with a cascade connection
- Up to 4 calls simultaneously
- Up to 6 units can be registered to the KX-TGP600
The KX-TGP600’s versatility makes it the ideal communications solution for a number of different industries and sectors. Here are just a few possible applications.

Retail

- As most employees in a retail environment work away from the central office, wireless handsets are a perfect tool, with the base station placed on the manager’s desk.
- As different members of staff deal with customers at the same time, overlapping ring assignments mean calls are answered without delay.
- Separate numbers can be assigned to different departments, to ring on specific handsets.
- The new TX-TPA65 wireless desktop phone can be used as an ‘always-available’ phone on the main in-store desk.

Warehouse

- Wireless handsets, connected to a wireless desktop phone in the central office, ensure constant communication.
- With the KX-TGP600, there’s no need for complex wiring over large areas such as warehouses.
- DECT coverage can be extended to outdoor areas, such as loading bays – and the KX-A406 repeater can extend this even further.
- The KX-UDT131, with its rugged design and dust protection, is the ideal handset for the tough environments encountered in a warehouse.

Small offices

- The KX-TGP600 provides one system to serve the entire needs of small offices and home workers.
- Separate numbers and ring tones can be allocated to different functions – including a ‘sales only’ line.
- Incoming calls can be routed by DDI to specific handsets.

Restaurants

- Mobility is important in a restaurant – wireless handsets and a central base station make this possible.
- Separate numbers and ring tones can be allocated to different handsets for different departments.
- The KX-UDT131, with its rugged design and dust protection, can withstand the many challenges presented by working in a kitchen.
