THE **ABSOLUTE®** PLATFORM

The Absolute® platform provides unbreakable visibility to centrally secure your TOUGHBOOK devices for unrivalled endpoint security and data risk management.

When a device goes dark, no matter the reason, you cannot take action to mitigate risks. In other words, you cannot secure what you cannot see.

The Absolute® platform eliminates these blind spots, providing you with a constant, self-healing connection to all of your endpoints at all times, whether or not they are on or off your corporate network. This uncompromised visibility and near real-time remediation is what sets Absolute apart.

Absolute technology is embedded into Panasonic devices at the factory. Once activated, it provides comprehensive visibility into all of your devices enabling you to eliminate dark endpoints, investigate potential threats, and take action if a security incident occurs. Most importantly, you can apply security measures remotely to each device. No other technology can do this.

ABSOLUTE VISIBILITY

provides always-connected visibility allowing you to collect hundreds of hardware, software, security, usage and geolocation data points automatically with 365 days of historical logs.

ABSOLUTE CONTROL

provides remote remedial capabilities to take action on the insights provided by our solution, such as geofencing, data delete, device freeze, among other remediation capabilities, and deep visibility into device utilization.

ABSOLUTE RESILIENCE

provides unrivalled security capabilities to effectively eliminate any dark endpoints, ensure application integrity, protect at-risk data, run custom query and remediation commands on demand on any device, and investigate device theft.

Absolute® provides Panasonic corporate customers with the ability to centrally track and secure their IT assets within a cloud-based console.

KEY FEATURES

ASSET INTELLIGENCE

Increase operational efficiency and reduce costs

Capabilities:

- Maintain a self-healing connection to all endpoints – on or off the corporate network
- Implement quickly with a cloud-based console with no infrastructure required
- See and control your entire endpoint population with a single pane of glass
- Automate compliance checks and device usage reports

SELF-HEALING

Persist security controls and configurations

Capabilities:

- Restore failing security agents with zero touch from IT
- Report on the health of security applications
- Assess your security posture with the security vitals dashboard
- Enforce configurations across your endpoint population as scale

PROVEN COMPLIANCE

Remotely detect and remediate vulnerable devices and at-risk data

Capabilities:

- Freeze and delete data remotely on compromised devices
- Detect devices that leave an authorised area with geofencing
- Take any action on any device remotely on or off the network
- Receive custom alerts when regulated or confidential data is at risk

BENEFITS

- **Increased efficiencies** – ROI in 3 to 6 months based on improved security ops and IT helpdesk efficiencies, asset lifecycle optimisation and reduced physical asset loss¹
- **Increased visibility** – Patented Absolute Persistence™ technology eliminates blind spots with a self-healing connection to every device
- **Reduced risk** – Ensures security controls are functioning and operational, enabling organisations to maintain continuous compliance
