

NETMOTION INTELLIGENT ENTERPRISE MOBILITY

The first and only intelligent software solution to provide optimised, secure connectivity and complete control on any mobile device, on any network.

NetMotion's software solutions improve the overall performance, visibility and security of the mobile enterprise. Its Mobile Performance Management and Operational Intelligence Platform gives IT the tools to monitor and dynamically make decisions using real-time data and analytics.

While organisations can supply their workers with the latest technology and applications, slowed or lost network connectivity, and a lack of visibility

for IT will reduce productivity, increase frustration and prove to be as costly as not having the right tools.

Panasonic and NetMotion Software have partnered to improve productivity for enterprise mobile workers by offering better connectivity and security for TOUGHBOOK users, while providing increased visibility and control for IT teams through NetMotion's advanced software solutions.

MOBILITY

NetMotion Mobility secures and optimises network connections to ensure business-critical applications are always accessible. The intelligent software adjusts performance to the ever-changing network conditions to ensure mobile workers always get the best user experience from their devices and applications.

- **Connectivity:** Optimises mobile traffic to ensure always-on, reliable access to applications, even in the toughest conditions.
- **Performance:** Ensures the highest level of mobile performance using various techniques, such as roaming to faster networks if better bandwidth is available.
- **Security:** Delivers military-grade encryption and control while providing a user experience designed for productivity.

DIAGNOSTICS

NetMotion Diagnostics reveals the root cause of connectivity-related problems across any device, network or application. It dramatically speeds the resolution of issues to ensure mobile users stay productive.

- **Troubleshooting:** Minimises downtime by quickly identifying problems with complete visibility and pinpoint accuracy.
- **Visibility:** Drives better decision making with complete awareness of network geo-location pitfalls and issues that can be discussed and resolved with carriers.
- **Reporting:** Provides automated reporting that ensures visibility into issues when they occur and allows for deeper analysis after the fact. Also supports data exports to SIEM tools.

MOBILE IQ

NetMotion's Mobile IQ software ingests all data generated from your NetMotion enabled devices to give you unprecedented visibility, all in a simple and intuitive platform.

- **Visualise:** Observe network, application, device or data flow trends in customised reports and dashboards tailored for your mobile workforce.
- **Track:** Study complete timelines of data usage, geo-location parameters, network health, and connectivity to drive informed decision making.
- **Protect:** View users, viruses and malicious applications on devices, then use NetMotion tools to quarantine or remediate the device or user.

| SKU | DESCRIPTION |
|-----------------------------|---|
| PCPE-NMW3* *025/100/250/500 | Mobility with 3 Years Maintenance (25-99 / 100-249 / 250-499 / 500-999) |
| PCPE-NMW5* *025/100/250/500 | Mobility with 5 Years Maintenance (25-99 / 100-249 / 250-499 / 500-999) |
| PCPE-NLW3* *025/100/250/500 | Mobility & Diagnostics with 3 Years Maintenance (25-99 / 100-249 / 250-499 / 500-999) |
| PCPE-NLW5* *025/100/250/500 | Mobility & Diagnostics with 5 Years Maintenance (25-99 / 100-249 / 250-499 / 500-999) |
| PCPE-NLW3EN1 | Mobility & Diagnostics with 3 Years Maintenance (1000+) |
| PCPE-NLW5EN1 | Mobility & Diagnostics with 5 Years Maintenance (1000+) |
