## WINDOWS AUTOPILOT

Deploy your devices in **Record Time**

Windows device deployment has been stuck in the dark ages until now... introducing Windows Autopilot – a simple cloud-managed tool – revolutionising the way Windows 10 Pro laptops and tablets are configured and provisioned.

### BUT WHY AUTOPILOT?

- TOUGHBOOK Windows Autopilot allows device configurations, updates and resets to be pushed to a fleet of any size, instantly.
- Reduce the time and cost demands placed on your already stretched IT department, without sacrificing on customisation, power or security.
- Windows Autopilot makes it easy for end users to set up new devices, with very little IT involvement needed whatsoever.

# WINDOWS AUTOPILOT ENROLMENT SERVICES AT A GLANCE

Your TOUGHBOOK devices arrive with the end-user with all their required configuration settings already uploaded to the cloud. Meaning they simply open the box, enter their credentials, download their profile and get straight to work. That means the best possible out-of-the-box experience for your users, while your IT teams are free to concentrate on other business-critical projects.

SKU	PRODUCT NAME
PCPE-PSAUTOP	Autopilot Device Enrolment (MOQ 25)

## WHAT ARE THE KEY BENEFITS OF WINDOWS AUTOPILOT?

- We can ship directly to your end users – there is no need for your IT team to be involved.
- Deployment of your TOUGHBOOK estate is much quicker as there are no intermediaries involved slowing the deployment process down.
- After servicing devices can be returned re-enrolled to your cloud server, meaning users can be back up and running faster.

Find out more about Windows Autopilot by visiting our webpage [business.panasonic.co.uk/mobile-solutions/proservices/solution-customisation/Autopilot](https://business.panasonic.co.uk/mobile-solutions/proservices/solution-customisation/Autopilot)
