## **PYRAMID COMPUTER** INTERACTIVE KIOSK SOLUTIONS

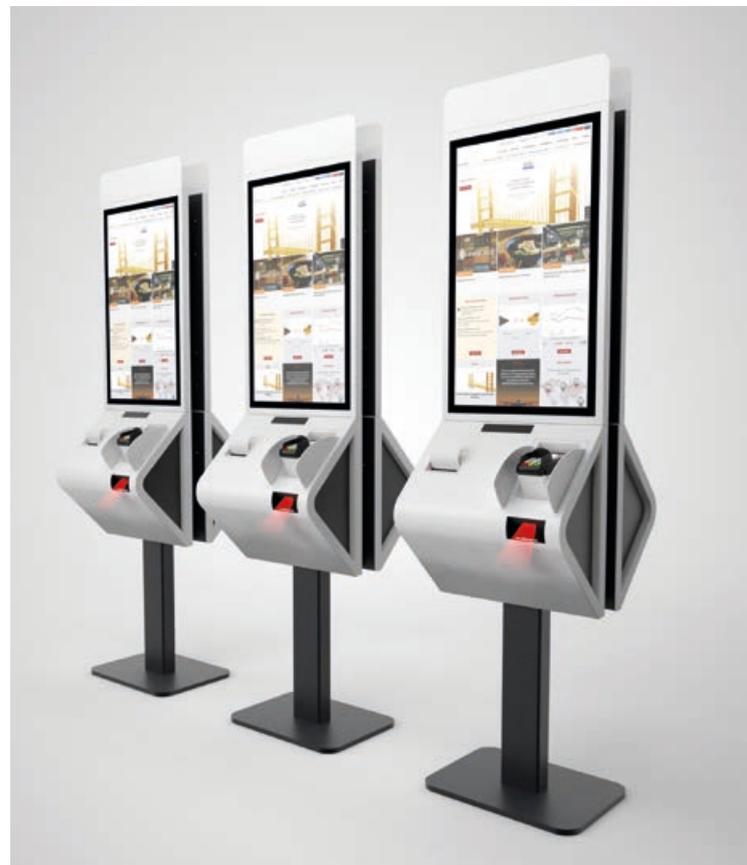

Modular and customisable self-service kiosks with space-saving design

Since 1985 Pyramid has specialised in the development and production of customised IT systems for professional use in various industries, with specific focus on hardware solutions, appliances, industrial IT solutions, and an extensive range of tailored services. Pyramid handles the entire process from development to manufacture, delivery, logistics and support.

Over 120 staff are employed at its headquarters in Freiburg, as well as at its production and logistics centre in Erfurt. A global service network as well as a sales office in the UK, highlight Pyramid's international outlook.

Unlike most kiosk manufacturers, Pyramid builds its own PC technology and touch screens. This high level of component manufacturing enables the company to create very slim and elegant, highly integrated designs, which remain extremely flexible and easy to maintain.

The "polytouch®" range of kiosks are successful worldwide in retail and QSR hospitality and are sold via OEM or sales partners, as a bespoke project and always UL certified.
