

HD Broadcast POV micro camera

Antelope Nano
HD Broadcast POV micro camera

KEY FEATURES

- Extremely small size
- High dynamic range
- Excellent light sensitivity

The Antelope Nano miniature live broadcast camera system offers spectacular Full HD footage and never seen before details from vantage points where larger cameras cannot be mounted.

The Antelope Nano camera supports video formats up 60p.

The system is based on a 1/1,2-type CMOS chip and provides high detail and unsurpassed light sensitivity.

The camera head's extremely small dimensions of 32x32x65mm allow unusual camera point of views in feature film, live broadcast, documentary or industrial environment.
