

Wireless Presentation System WP Series

AVAILABLE FROM SEPTEMBER 2020

Availability varies depending on model

Panasonic's Proposal for Work Style Reform with a New Wireless Presentation System, "PressIT"

Achieving Efficient and Collaborative Meetings with just a simple click

• Smart and Clear Installation with Just an HDMI or USB cable

Two types of receivers are available for video and audio signals from PCs, iOS/Android, and other mobile devices. The STB type can be used by both Panasonic and other professional displays and projectors. The terminal board (Intel® SDM) type receiver is exclusively for use by devices such as Panasonic SQ1 Series. Neither requires software. Both can be used with a simple connection.

• No Special Setup Necessary with Super Simple One Touch Operation

There is no special software installation necessary for the PC. The presenter's PC can also be switched by simple click of a button, with no need to reconnect the cable. Additionally, images can be presented to up to 4 users, which encourages more proactive meetings.

• High-quality images for smooth stress-free presentations

Hardware processing enables image compression and decompression for Full-HD resolution. Wireless transmission is IEEE802.11ac compliant. Presentations with video content are smooth, for effective meetings with the support of 1080/60p.

Wireless Presentation System				
Model Type	Receiver		Transmitter	
	Set top box	Function Board (Intel® SDM)	USB-Type-A/HDMI	USB Type-C
Model no.	-	TY-SB01WP	TY-WPB1	TY-WPC1
Output Resolution (Max)	4K (3840 x 2160)		Full HD (1920 x 1080)	
Frame rate	Up to 60 fps			
Wi-Fi	IEEE802.11ac 5GHz max. 433 Mbps			
Authentication protocol	TBD			
Registered no. of Transmitters	32 units
