Thank you for purchasing this Panasonic Product.
■ Before operating this product, please read the instructions carefully, and save this manual for future use.
■ Before using your projector, be sure to read "Read this first!" (See pages 2 to 7).
### Read this first!

<table>
<thead>
<tr>
<th>WARNING:</th>
<th>THIS APPARATUS MUST BE EARTHED.</th>
</tr>
</thead>
</table>

**WARNING:** To prevent damage which may result in fire or shock hazard, do not expose this appliance to rain or moisture. This device is not intended for use in the direct field of view at visual display workplaces. To avoid incommoding reflexions at visual display workplaces this device must not be placed in the direct field of view. The equipment is not intended for used at a video workstation in compliance BildscharbV. The sound pressure level at the operator position is equal or less than 70 dB (A) according to ISO 7779.

**WARNING:**
1. Remove the plug from the mains socket when this unit is not in use for a prolonged period of time.
2. To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
3. Do not remove the earthing pin on the mains plug. This apparatus is equipped with a three prong earthing type mains plug. This plug will only fit an earthing-type mains socket. This is a safety feature. If you are unable to insert the plug into the mains socket, contact an electrician. Do not defeat the purpose of the earthing plug.

**CAUTION:** To assure continued compliance, follow the attached installation instructions. The user must use the provided RGB computer interface cable with ferrite cores. If HDMI interface cable is to be used, the user must use only shielded HDMI interface cable with ferrite cores to avoid potential harmful interference. Any unauthorized changes or modifications to this equipment will void the user’s authority to operate.

#### Product information (for Turkey only)

EEE Yönetmeliğine Uygundur.
EEE Complies with Directive of Turkey.

**WARNING:** TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.
WARNING:

■ POWER

The wall outlet or the circuit breaker shall be installed near the equipment and shall be easily accessible when problems occur. If the following problems occur, cut off the power supply immediately.

Continued use of the projector in these conditions will result in fire or electric shock.

- If foreign objects or water get inside the projector, cut off the power supply.
- If the projector is dropped or the cabinet is broken, cut off the power supply.
- If you notice smoke, strange smells or noise coming from the projector, cut off the power supply.

Please contact an Authorized Service Center for repairs, and do not attempt to repair the projector yourself.

During a thunderstorm, do not touch the projector or the cable.

Electric shocks can result.

Do not do anything that might damage the power cord or the power plug.

- If the power cord is used while damaged, electric shocks, short-circuits or fire will result.
- Do not damage the power cord, make any modifications to it, place it near any hot objects, bend it excessively, twist it, pull it, place heavy objects on top of it or wrap it into a bundle.
- Ask an Authorized Service Center to carry out any repairs to the power cord that might be necessary.

Completely insert the power plug into the wall outlet and the power connector into the projector terminal.

If the plug is not inserted correctly, electric shocks or overheating will result.

- Do not use plugs which are damaged or wall outlets which are coming loose from the wall.

Do not use anything other than the provided power cord.

Failure to observe this will result in fire or electric shocks. Please note that if you do not use the provided power cord to ground the device on the side of the outlet, this may result in electric shocks.

Clean the power plug regularly to prevent it from becoming covered in dust.

Failure to observe this will cause a fire.

- If dust builds up on the power plug, the resulting humidity can damage the insulation.
- If not using the projector for an extended period of time, pull the power plug out from the wall outlet.
  Pull the power plug out from the wall outlet and wipe it with a dry cloth regularly.

Do not handle the power plug with wet hands.

Failure to observe this will result in electric shocks.

Do not overload the wall outlet.

If the power supply is overloaded (ex., by using too many adapters), overheating may occur and fire will result.

■ ON USE/INSTALLATION

Do not place liquid containers on top of the projector.

If water spills onto the projector or gets inside it, fire or electric shocks will result.

If any water gets inside the projector, contact an Authorized Service Center.

Do not place the projector on soft materials such as carpets or sponge mats.

Doing so will cause the projector to overheat, which can cause burns, fire or damage to the projector.

Do not set up the projector in humid or dusty places or in places where the projector may come into contact with oily smoke or steam, ex. a bathroom.

Using the projector under such conditions will result in fire, electric shocks or components deterioration.

Components deterioration (such as ceiling mount brackets) may cause the projector which is mounted on the ceiling to fall down.

Do not install this projector in a place which is not strong enough to take the full weight of the projector or on top of a surface which is sloped or unstable.

Failure to observe this will cause projector to fall down or tip over the projector, and severe injury or damage could result.

Do not place another projector or other heavy objects on top of the projector.

Failure to observe this will cause the projector to become unbalanced and fall, which could result in damage or injury. The projector will be damaged or deformed.
WARNING:

Installation work (such as ceiling mount bracket) should only be carried out by a qualified technician.
If installation is not carried out and secured correctly it can cause injury or accidents, such as electric shocks.
- Do not use anything other than an authorized ceiling mount bracket.
- Be sure to use the wire provided with the projector mount base for ceiling mount as an extra safety measure to prevent the projector from falling down. (Install in a different location to the ceiling mount bracket.)

Do not cover the air inlet port or the air outlet port.
Doing so will cause the projector to overheat, which can cause fire or damage to the projector.
- Do not place the projector in narrow, badly ventilated places.
- Do not place the projector on cloth or papers, as these materials could be drawn into the air inlet port.

Do not place your hands or other objects close to the air outlet port.
Doing so will cause burns or damage your hands or other objects.
- Heated air comes out of the air outlet port. Do not place your hands or face, or objects which cannot withstand heat close to this port.

Do not look and place your skin into the lights emitted from the projection window while the projector is being used.
Doing so can cause burns or loss of sight.
- Strong light is emitted from the projector’s projection window. Do not look or place your hands directly into this light.
- Be especially careful not to let young children look into the projection window. In addition, turn off the power and disconnect the power plug when you are away from the projector.

Do not insert any foreign objects into the projector.
Doing so will cause fires or electric shocks.
- Do not insert any metal objects or flammable objects into the projector or drop them onto the projector.

Never attempt to remodel or disassemble the projector.
High voltages can cause fire or electric shocks.
- For any inspection, adjustment and repair work, please contact an Authorized Service Center.

Do not allow metal objects, flammable objects, or liquids to enter inside of the projector. Do not allow the projector to get wet.
Doing so may cause short circuits or overheating, and result in fire, electric shock, or malfunction of the projector.
- Do not place containers of liquid or metal objects near the projector.
- If liquid enters inside of the projector, consult your dealer.
- Particular attention must be paid to children.

Use the ceiling mount bracket and the wall mount bracket specified by Panasonic.
Defects in the ceiling mount bracket will result in falling accidents.
- Attach the supplied safety cable to the ceiling mount bracket to prevent the projector from falling down.

WARNING:

■ ACCESSORIES

Do not use or handle the battery improperly, and refer to the following.
Failure to observe this will cause burns, battery to leak, overheat, explode or catch fire.
- Do not use unspecified battery.
- Do not disassemble coin cell battery.
- Do not heat the battery or place them into water or fire.
- Do not allow the + and − terminals of the battery to come into contact with metallic objects such as necklaces or hairpins.
- Do not bring or store battery together with metallic objects.
- Store the battery in a plastic bag and keep them away from metallic objects.
- Make sure the polarities (+ and −) are correct when inserting the battery.
- Remove the empty battery from the remote control at once.
- Insulate the battery using tape or something similar before disposal.
Do not allow children to reach the battery (CR2025).
- The battery can cause personal injury if swallowed.
- If swallowed, seek medical advice immediately.

If the battery fluid leaks, do not touch it with bare hands, and take the following measures if necessary.
- Battery fluid on your skin or clothing could result in skin inflammation or injury.
  Rinse with clean water and seek medical advice immediately.
- Battery fluid coming in contact with your eyes could result in loss of sight.
  In this case, do not rub your eyes. Rinse with clean water and seek medical advice immediately.

Do not disassemble the lamp unit.
If the lamp breaks, it could cause injury.

Do not remove unspecified screws during the lamp unit replacement.
Doing so can cause electric shocks, burns, or injury.

Lamp replacement
The lamp has high internal pressure. If improperly handled, an explosion and severe injury or accidents will result.
- The lamp can easily explode if struck against hard objects or dropped.
- Before replacing the lamp, be sure to disconnect the power plug from the wall outlet.
  Electric shocks or explosions can result if this is not done.
- When replacing the lamp, turn the power off and allow the lamp it to cool for at least 1 hour before handling it otherwise it can cause burns.

Do not allow infants or pets to touch the remote control unit.
- Keep the remote control unit out of the reach of infants and pets after using it.

Do not use the supplied power cord with devices other than this projector.
- Using the supplied power cord with devices other than this projector may cause short circuits or overheating, and result in electric shock or fire.

Remove the depleted battery from the remote control promptly.
- Leaving them in the unit may result in fluid leakage, overheating, or explosion of the battery.

CAUTION:

POWER
When disconnecting the power cord, be sure to hold the power plug and power connector.
If the power cord itself is pulled, the lead will become damaged, and fire, short-circuits or serious electric shocks will result.

When not using the projector for an extended period of time, disconnect the power plug from the wall outlet.
Failure to do so may result in fire or electric shock.

Disconnect the power plug from the wall outlet before carrying out any cleaning and replacing the unit.
Electric shocks can result if this is not done.

ON USE/INSTALLATION
Do not put your weight on this projector.
You could fall or the projector could break, and injury will result.
- Be especially careful not to let young children stand or sit on the projector.

Do not place the projector in extremely hot locations.
Doing so will cause the outer casing or internal components to deteriorate, or result in fire.
- Take particular care in locations exposed to direct sunlight or near stoves.

Do not make strong force or shock to the mirror.
Doing so may cause damage to the glass mirror.

Always disconnect all cables before moving the projector.
Moving the projector with cables still attached can damage the cables, which will cause fire or electric shocks to occur.

Never plug headphones and earphones into AUDIO OUT jack.
Excessive sound pressure from earphones and headphones can cause hearing loss.
Read this first!

**ACCESSORIES**

Do not use the old lamp unit.
If used it could cause lamp explosion.

If the lamp has broken, ventilate the room immediately. Do not touch or bring your face close to the broken pieces.
Failure to observe this will cause the user to absorb the gas which was released when the lamp broke and which contains nearly the same amount of mercury as fluorescent lamps, and the broken pieces will cause injury.
- If you believe that you have absorbed the gas or that the gas has got into your eyes or mouth, seek medical advice immediately.
- Ask your dealer about replacing the lamp unit and check the inside of the projector.

When not using the projector for an extended period of time, remove the battery from the remote control.
- Failure to observe this will cause the battery to leak, overheat, catch fire or explode, which may result in fire or contamination of surrounding area.

Do not open the desiccant bag or eat it, and do not discard it to moisture circumstances.
Accidentally swallow the contents of the desiccant bag may cause bad result to your body. Moreover, the contents may generate heat if exposing to moisture, so it may cause inflammation or injury to your skin if such contents is attached to your body or clothes.
- In case that the desiccant has got into your eyes or mouth, wash with clean water immediately and seek medical advice.
- Particular attention must be paid to children.

**CAUTION:**

**VIEWING 3D IMAGES**

Those with a medical history of oversensitivity to light, heart problems, or poor physical health should not view 3D images.
This may lead to a worsening of medical conditions.

If you feel tiredness or discomfort, or other abnormality while viewing with 3D Eyewear, discontinue viewing.
Continuing use may cause health problems. Take a break as necessary.

When viewing 3D movies, aim to view one movie at a time and take a break as necessary.

When viewing 3D images, for example when playing 3D games or using a PC where two way interaction is possible, take an appropriate break every 30 to 60 minutes.
Watching for long periods of time may cause eye fatigue.

When preparing contents, use contents properly created to be used for 3D.
This may cause eye fatigue or health problems.

When viewing 3D images, pay attention to people and objects in the vicinity.
3D video may be mistaken for actual objects, and the related bodily movements can cause damage to objects and lead to injury.

Use 3D Eyewear when viewing 3D videos.
Do not tilt your head when viewing with 3D Eyewear.
Those who are near or far sighted, those with weaker eyesight in one eye, or those with astigmatism should use corrective eyewear etc. when using 3D Eyewear.

If the image appears distinctly double when viewing 3D video, discontinue viewing.
Watching for long periods of time may cause eye fatigue.

View at a distance of at least three times the effective height of the screen.
Viewing at distance closer than the recommended distance may cause eye fatigue. As with movies, if there are black bands at the top and bottom of the video, view at a distance of 3 times or more of the height of the video section.

Children younger than 5 or 6 years old should not use 3D Eyewear.
As it is difficult to gauge the reactions of children to fatigue and discomfort their condition may worsen suddenly.
If a child uses the 3D Eyewear, guardians should beware of the child’s eyes becoming tired.
To remove the battery

Remote Control Battery

1. Press the guide and pull out the battery base.
2. Remove the battery.

Trademarks

- HDMI, the HDMI Logo, and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

- PJLink™ is a trademark or pending trademark in Japan, the United States, and other countries and regions.

- RoomView, Crestron RoomView are registered trademarks of Crestron Electronics, Inc, and Crestron Connected is the trademark of Crestron Electronics, Inc.

- Other names, company names or product names used in these operating instructions are the trademarks or registered trademarks of their respective holders.

Please note that the operating instructions do not include the ® and ™ symbols.

Illustrations in these operating instructions

- Note that illustrations of the projector and screens may differ from the ones you actually see.

Page references

- In these instructions, references to pages are indicated as: (►page 00).

Term

- In these instructions, the “Wireless remote control unit” accessory is referred to as the “Remote control”.
You can use the projector to view 3D videos by playing media such as Blu-ray 3D compatible discs on a 3D device such as a 3D Blu-ray player.

Short focus lens allows you to project large images from short distance. If the presenter stands in front of the projecting board, the image of the presenter will not go into the board and the projecting light will not directly go into the presenter's eyes.

The 3 100 lm* brightness enables you to project bright and clear image under educational circumstances even in a bright classroom.

(* 3 100 lm is for PT-CW330E and PT-CX300E. 2 600 lm is for PT-CW240E.)

Features of the Projector

Quick steps

1. Set up your projector. (page 20)
2. Connect with other devices. (page 25)
3. Connect the power cord. (page 28)
4. Power on. (page 30)
5. Select the input signal. (page 31)
6. Adjust the image. (page 31)

For details, see the corresponding pages.

Precautions for Use

Cautions when transporting

- When transporting the projector, be careful not to touch the mirror.
- When transporting the projector, hold it securely by its bottom and avoid excessive vibration and impacts. Doing so may damage the internal parts and result in malfunctions.
- Do not transport the projector with the adjustable feet extended. Doing so may damage the adjustable feet.

Cautions when installing

- Do not set up the projector outdoors.
The projector is designed for indoor use only.
- Do not use under the following conditions.
  - Places where vibration and impacts occur such as in a car or vehicle: Doing so may damage the internal parts and result in malfunctions.
  - Near the exhaust of an air conditioner: Depending on the conditions of use, the screen may fluctuate in rare cases due to the hot air from the air exhaust port or the heated or cooled air. Make sure that the exhaust from the projector or other equipment, or the air from the air conditioner does not blow toward the front of the projector.
  - Near lights (studio lamps, etc.) and other locations of great temperature fluctuation (“Operating environment” (page 71)): Doing so may shorten the life of the lamp or result in deformation of the outer case and malfunctions.
  - Near high-voltage power lines or near motors: Doing so may interfere with the operation of the projector.
  - Place where there is high-power laser equipment: Directing a laser beam onto the lens surface causes damage to the DLP chips.
- Be sure to ask a specialized technician when installing the product to a ceiling or wall.
  This requires an optional ceiling mount bracket.
  Model No.: ET-PKV100H (for high ceilings), ET-PKV100S (for low ceilings), ET-PKC200B (Projector Mount Base), ET-PKC200W (Wall Mount Bracket).
- Lens focus
  The high clarity projection lens is thermally affected by the light from the light source, making the focus unstable in the period just after switching on the power. Wait at least 30 minutes with the image projected before adjusting the lens focus.
- When using the projector at elevations below approx. 1 000 m (3 300 ft), make sure [High altitude] is set to [Off].
  Failure to do so may shorten the life of the internal parts and result in malfunctions.
- When using the projector at elevations approx. 1 000 m (3 300 ft) and approx. 3 000 m (10 000 ft), make sure [High altitude] is set to [On].
  Failure to do so may shorten the life of the internal parts and result in malfunctions.
- Do not install the projector at elevations approx. 3 000 m (10 000 ft) or higher above sea level.
  Failure to do so may shorten the life of the internal parts and result in malfunctions.
- Confirm and set the using environment temperature [“Operating environment” (page 71)].
Precautions for Use

Do not tilt the projector or place it on its side.
Do not tilt the projector body more than approximately ±10° vertically or ±10° horizontally. Over-tilting may result in shortening the life of the components.

Cautions when setting the projectors
- Do not stack the projectors.
- Do not block the ventilation ports (intake and exhaust) of the projector.
- Avoid heating and cooling air from the air conditioning system directly blow to the ventilation ports (intake and exhaust) of the projector.

Security
Take safety measures against following incidents.
- Personal information being leaked via this product.
- Unauthorized operation of this product by a malicious third party.
- Interfering or stopping of this product by a malicious third party.
Security instruction (⇒ page 52)
- Make your password as difficult to guess as possible.
- Change your password periodically.
- Panasonic or its affiliate company never inquires a password directly to a customer. Do not tell your password in case you receive such an inquiry.
- The connecting network must be secured by firewall or others.
- Set an administrator password for the Web Management and restrict the users who can log in.

Disposal
When disposing of the product, ask your local authority or dealer about the correct methods of disposal. The lamp contains mercury. When disposing of the used lamp unit, ask your nearest local authorities or dealer about proper disposal of the unit. Dispose of used battery according to the instructions or your local disposal rule or guidelines.
Cautions on use

**In order to get the picture quality**
- Draw curtains or blinds over windows and turn off any lights near the screen to prevent outside light or light from indoor lamps from shining onto the screen.
- Depending on where the projector is used, heated air from an exhaust port or warm or cold air from an air conditioner can cause a shimmering effect on screen. Avoid use in locations where exhaust or streams of air from projector, other devices and air conditioners flow between the projector and the screen.
- The lens of projector is affected by the heat from the luminous source. Because of this, the focusing may not be stable right after the power is turned on. Focusing is stabled after projecting image for 30 minutes and longer.

**Do not touch the surface of the mirror and the projection lens with your bare hand.**
If the surface of the mirror and the projection lens becomes dirty from fingerprints or anything else, this will be magnified and projected onto the screen.

**DLP chips**
- The DLP chips are precision-made. Note that in rare cases, pixels of high precision could be missing or always lit, but this is not a malfunction.
- Directing a high power laser beam onto the projection window surface can damage the DLP chips.

**Optical components**
Operating the projector in an environment with high temperature or heavy exposure to dust or tobacco smoke will reduce the service life of the optical components and may necessitate their replacement within less than one year of use. For details, consult your dealer.

**Lamp**
The luminous source of the projector is a mercury lamp with high internal pressure.
A high pressure mercury lamp has following characteristics.
- The brightness of the lamp will decrease by duration of usage.
- The lamp may burst with sound or shorten life by shock or chipping.
- The life of the lamp varies greatly depending on individual specificities and usage conditions. In particular, continuous use over 22 hours and frequent on/off switching of the power greatly deteriorate the lamp and affect the lamp life.
- In rare cases, the lamp burst shortly after the projection.
- The risk of bursting increases when the lamp is used beyond its replacement cycle. Make sure to replace the lamp unit consistently. (page 58)
- If the lamp bursts, gas contained inside of the lamp is released in a form of smoke.
- It is recommended to store replacement lamps for contingency.
- It is recommended to have authorized engineer or your dealer replace the lamp unit.

**About connections to computer or peripheral device**
To assure continued compliance, follow the attached installation instructions, which include using the provided power cord and shielded interface cables when connecting to computer or peripheral device.

**Importer’s name and address within the European Union**
Panasonic Marketing Europe GmbH
Panasonic Testing Center
Winsbergring 15, 22525 Hamburg, Germany
**Precautions for Use**

**Accessories**

Make sure the following accessories are provided with your projector. Numbers in the brackets ( ) show the number of accessories.

</tr>
</tbody>
</table>

**Attention**

After unpacking the projector, discard the power cord cap and packaging material properly.

- For lost accessories, consult your dealer.
- The part numbers of accessories and separately sold components are subject to change without notice.
- Store small parts in an appropriate manner, and keep them away from young children.

### Remote control

1. **Remote control signal emitter**
2. **<COMPUTER> button**
   - Switches COMPUTER 1 or COMPUTER 2 input. If either of the input is selected, press <COMPUTER> button will switch to the other one.
3. **<>< button**
   - Turns the projector on/off.
4. **<3D> button**
   - Displays [3D] menu.
5. **<FREEZE> button**
   - Temporarily stops the image and mute the sound. Press again to return to previous state.
6. **<MENU> button**
   - Turns the main menu on/off.
7. **<INPUT> button**
   - Displays [Source] menu. (➤ page 31)
8. **<MUTE> button**
   - Temporarily mutes the sound. Press again to return to previous state.
9. **<KEYSTONE -> button**
   - Adjusts the image to compensate for distortion caused by tilting the projector.
10. **<AV MUTE> button**
    - Momentarily turns off/on the audio and video. Press again to return to previous state.
11. **<HDMI> button**
    - Switches to HDMI source.
12. **<S-VIDEO> button**
    - Switches to S-Video source.
13. **<VIDEO> button**
    - Switches to Video source.
14. **<KEYSTONE >> button**
    - Adjusts the image to compensate for distortion caused by tilting the projector.
15. **<IMAGE> button**
    - Selects the color mode among Dynamic, PC, Movie, Game and User.
16. **▲▼◄► buttons**
    - Uses to operate menu.
17. **<AUTO ADJ.> button**
    - Automatically synchronize the projector to the input source.
18. **<ASPECT> button**
    - Selects [Aspect Ratio] in [Screen].
19. **<VOLUME +/-> buttons**
    - Increases/decreases speaker volume.

### Attention
- Do not drop the remote control.
- Avoid contact with liquids.
- Do not attempt to modify or disassemble the remote control.

### Note
- The <AUTO ADJ.> operation may not optimize the image position or the resolution, depending on the input signal format or the image contents. In this case, switch to a different image and execute <AUTO ADJ.> again.
- When pointing the remote control directly toward the projector (Remote control signal receiver), operating range for the remote control is within 8 m (26.25 ft). Also, operation range available for four directions (up, down, left, right to the projector) is ± 35° and the operation distance may become short.
- If there are any obstacles between the remote control and the remote control signal receiver, the remote control may not operate correctly.
- You can operate the projector by reflecting the remote control signal on the screen. The operating range may differ due to the loss of light caused by the properties of the screen.
- When the remote control signal receiver is lit with a fluorescent light or other strong light source, the projector may become inoperative. Set the projector as far from the luminous source as possible.
- You can operate all of the functions of the projector via the remote control. Make sure not to lose the remote control.
- Before using the remote control for the first time, remove the transparent insulation tape.
About Your Projector

**Projector body**

1. Air intake port
2. Mirror Cover
3. Remote control signal receiver
4. Air exhaust port

**WARNING:**
- Keep your hands and other objects away from the air exhaust port.
  - Keep your hand and face away.
  - Do not insert your finger.
  - Keep heat-sensitive articles away.

Heated air from the air exhaust port can cause burns or external damage.

5. Lamp cover (⇒ page 59)
6. Connecting terminals (⇒ page 18)
7. Speaker
8. Adjustable feet
   Adjusts the projection angle.
9. <AC IN> terminal
10. Focus Ring
    Adjusts the focus.
11. Control panel and Indicators (⇒ page 17)
12. Security slot
    Attaches the commercial shackle lock, manufactured by Kensington, to protect your projector. Compatible with the Kensington MicroSaver Security System.
13. Security Bar
    You can install designed wire to prevent theft.
**About Your Projector**

**Control Panel and Indicators**

1. **<ON(G) / STANDBY(R)> indicator**
   Indicates the projector’s status.

2. **<>/ button**
   Turns the projector on/off.

3. **<MENU> button**
   Turns the main menu on/off.

4. **Remote control signal receiver**

5. **▲▼◄► buttons**
   Uses to operate menu.

6. **<AUTO ADJ.> button**
   Automatically synchronize the projector to the input source for computer input.

7. **<INPUT> button**
   Displays [Source] menu. (page 31)

8. **<LAMP> indicator**
   Indicates the projector’s lamp status.

9. **<TEMP> indicator**
   Indicates the status of the internal temperature or the cooling fan of the projector.

**Note**

- The <AUTO ADJ.> operation may not optimize the image position or the resolution, depending on the input signal format or the image contents. In this case, switch to a different image and execute <AUTO ADJ.> again.

**Attention**
- When a LAN cable is directly connected to the projector, the network connection must be made indoors.

**Note**
- When the <HDMI IN> terminal is connected to a computer via a HDMI-DVI conversion cable, it can only input video signal and the analog audio signal cannot be input.
Using Remote control

Installing and Removing battery

1) Press the guide and pull out the battery base.

2) Install new battery into the compartment.

3) Put the cover back.

Attention
- When discarding a lithium coin battery, be sure both sides (+/-) are covered with adhesive insulating tape, such as and the cellophane tape, and discard it according to the instructions of the local government.

Setting Remote control ID numbers

When you use the system with multiple projectors, you can operate all the projectors simultaneously or each projector individually using single remote control, if unique ID number is assigned to each projector.
After setting the remote control ID of the projector, set the same remote control ID to the remote control.
There are 7 different remote control IDs: [All], [ID1]~[ID6], the initial remote control ID is [All].

Setting the remote control ID

1) While holding down the <MENU> key, press the <IMAGE> key. The number of times you press the <IMAGE> key corresponds to the desired remote control ID.
   The number of times to press the <IMAGE> key is as follows:
   ID1 = Once, ID2 = Twice, ID3 = 3 times, ID4 = 4 times, ID5 = 5 times, ID6 = 6 times.
2) The remote control ID is changed when the <MENU> button is released.

Resetting the remote control ID

1) The remote control ID is reset to [All] (default) by pressing the <MENU> key and <IMAGE> key at the same time for 10 seconds or more.

Note
- When operating the projector under [All] code, you can operate several projectors at the same time.
- If the <IMAGE> button is pressed 7 times or more, the remote control ID cannot be changed (the operation is invalid).
- For setting the remote control ID codes, see [Remote ID] in the [Setting] menu. (page 41)
- If the battery is not in use for a long period of time and is removed from the remote control, the remote control ID will be reset.
Setting up

Projection method

You can use the projector with any of the following 4 projection methods to set the desired method in the projector.

- Mounting on the ceiling and projecting forward
- Mounting on the ceiling and projecting from rear (Using translucent screen)
- Setting on a desk/floor and projecting from forward
- Setting on a desk/floor and projecting rear (Using translucent screen)

Attention

For optimum viewing quality, install the projector in a location where screen exposure to outside light, light from light fixtures or other light is at a minimum. Also draw the curtains, close blinds and turn off light fixtures.

Parts for ceiling or wall mount (Optional)

You can install the projector on the ceiling or wall by using the optional ceiling mount bracket (ET-PKV100H: for high ceiling, ET-PKV100S: for low ceiling), the optional projector mount base ET-PKC200B, and the optional wall mount bracket ET-PKC200W.

- Use only the ceiling mount brackets or wall mount bracket specified for this projector.
- Refer to the installation manual for the ceiling mount bracket or wall mount bracket when you install the bracket or hanger and the projector.

Attention

To ensure projector performance and security, installation of the ceiling mount bracket or wall mount bracket must be carried by your dealer or a qualified technician.
Adjusting Projection Image Size

For the setting of this projector, please refer to the following diagram or the projection distance on the next page.

**Attention**
- Before installing, please read “Precautions for Use”, (pages 11 to 14)
- Do not use the projector and the high-powered laser equipment in the same room. Hitting of a laser beam on to the lens can damage the DLP chips.

**Note**
- Make sure the surface of the projection screen not be bended, otherwise the projection image may not be projected correctly.

<table>

<td>1.219</td>
<td>1.626</td>
<td>0.683</td>
<td>0.348</td>
</tr>
</tbody>
</table>

### Calculation formulas for projection distance

Any other projection distance can be obtained according to the screen dimensions (m) using the following calculations. The calculation result is with the "m" unit. (The calculated distance below may contain a certain error.)

If the screen dimensions are written as "SD",

<table>
<thead>
<tr>
<th>For 16:10 aspect ratio</th>
<th>For 16:9 aspect ratio</th>
<th>For 4:3 aspect ratio</th>
</tr>
</thead>
<tbody>
<tr>
<td>Screen height (SH)</td>
<td>(= SD \times 0.530)</td>
<td>(= SD \times 0.490)</td>
</tr>
<tr>
<td>Screen width (SW)</td>
<td>(= SD \times 0.848)</td>
<td>(= SD \times 0.872)</td>
</tr>
<tr>
<td>Throw distance A</td>
<td>(= 0.3189 \times SD - 0.0508)</td>
<td>(= 0.3276 \times SD - 0.05072)</td>
</tr>
</tbody>
</table>

### Attention

- In order to maintain the performance of the lens, please set up the Throw distance A between 0.516 m to 0.759 m.

### Note

- The throw ratio is 0.35:1 when the projection size is 80 inch.
## Projection distance for PT-CX300E

### For 4:3 aspect ratio (unit: m)
(There maybe some errors in the dimensions shown in the table below.)

<table>
<thead>
<tr>
<th>Projection size</th>
<th>Throw distance A</th>
<th>Throw distance B</th>
<th>Projector top to Bottom of the screen</th>
<th>Projector bottom to Bottom of the screen</th>
</tr>
</thead>
<tbody>
<tr>
<td>Diagonal (SD)</td>

</tbody>
</table>

### Calculation formulas for projection distance
Any other projection distance can be obtained according to the screen dimensions (m) using the following calculations.
The calculation result is with the "m" unit. (The calculated distance below may contain a certain error.) If the screen dimensions are written as "SD",

<table>
<thead>
<tr>
<th>Screen height (SH)</th>
<th>Screen width (SW)</th>
<th>Throw distance A</th>
</tr>
</thead>
<tbody>
<tr>
<td>Screen height (SH)</td>
<td>= SD × 0.6</td>
<td>= SD × 0.8</td>
</tr>
<tr>
<td>Screen width (SW)</td>
<td>= SD × 0.6</td>
<td>= SD × 0.8</td>
</tr>
<tr>
<td>Throw distance A</td>
<td>= 0.3700 × SD – 0.04150</td>
<td>= 0.4037 × SD – 0.04202</td>
</tr>
</tbody>
</table>

### Attention
- In order to maintain the performance of the lens, please set up the Throw distance A between 0.523 m to 0.805 m.

### Note
- The throw ratio is 0.44:1 when the projection size is 80 inch.
Adjusting the Projector’s Height

The projector is equipped with elevator feet for adjusting the image height. Extend the adjustable feet by rotating in the direction shown in the below picture and retract by rotating in the opposite direction.

Pull out the spacer (detachable) with the convex part of the spacer. Rotate the rear adjustable feet with the spacer installed, the adjustable range is 3.52°. When the spacer (detachable) is removed, the rear adjustable feet shrink to its end and the front adjustable feet stretch to its end, the adjustable range is 5.9° in the opposite direction.

Attention
- Hot air is expelled from the air exhaust port. Do not touch the air exhaust port directly when adjusting the adjustable feet.
- Keep the spacer out of the reach of children and store properly when it is removed.

Adjusting the Projector’s Focus

To focus the image, rotate the focus ring until the image is clear.
Connections

Before connecting to the projector

- Read carefully the instruction manual for the device to be connected.
- Turn off the power switch of the devices before connecting cables.
- If any connection cable is not supplied with the device, or if no optional cable is available for connection of the device, prepare a necessary system connection cable to suit the device.
- Video signals containing too much jitter may cause the images on the screen to randomly wobble or wafture. In this case, a time base corrector (TBC) must be connected.
- The projector accepts the following signals: VIDEO, S-VIDEO, analogue-RGB (with TTL sync. Level) and digital signal.
- Some computer models are not compatible with the projector.
- When using long cables to connect with each of equipment to the projector, there is a possibility that the image will not be output correctly unless a compensator is used.
- For details on what video signals the projector supports, see “List of compatible signals”. ( pages 68-69)

Attention

- When connecting with a video deck, be sure to use the one with a built-in time base corrector (TBC) or use a TBC between the projector and the video deck.
- If nonstandard burst signals are connected, the image may be distorted. If this is the case, connect a TBC between the projector and the video deck.

Note

- Use an HDMI cable that conforms to HDMI standards such as an HDMI High Speed cable. If a cable that does not meet HDMI standards is used, video may be interrupted or may not be displayed.
- When connecting the 1080p signal using HDMI, use a cable compliant with 1080p signal.
- This projector does not support the VIERA Link (HDMI).
Connecting example: Computers

1. HDMI Cable
2. LAN Cable
3. Computer Cable
4. Stereo sound Cord
5. Stereo sound Cord
6. Computer Cable
Connecting example: AV equipment

1. HDMI Cable
2. S-Video Cord
3. Stereo sound Cord
4. Mini stereo sound Cord
5. Component Video Cord
6. D-Sub Component Converse Adapter
7. Video Cord
8. Stereo sound Cord
Connecting the power cord

Make sure that the supplied power cord is securely fixed to the projector to prevent removal of the power cord.

**Installation**

1) Insert the power cord holder in the holes provided above and below the AC input terminal.
   - Push the power cord holder to the left to allow insertion of the power cord.

2) Connect the strap to power cable to prevent missing the power cord cover.

3) Attach the power cord cover to the cord in the direction of (i) and press it firmly in the direction of (ii).

4) Connect the power cord to the AC input terminal.

5) Move the power cord holder to secure the power cord.

**Removal**

1) Push the power cord holder to the left.

2) Remove the power cord from the AC input terminal.
ON(G)/STANDBY(R) indicator

The ON(G)/STANDBY(R) indicator informs you the status of the power. Confirm the status of the <ON(G)/STANDBY(R)> indicator before operating the projector.

### Indicator status

<table>
<thead>
<tr>
<th>Indicator status</th>
<th>Status</th>

<tr>
<td>Flashing</td>
<td>The projector is preparing to switch off the power.</td>
</tr>
<tr>
<td></td>
<td>The power is switched off after a while. (Changes to the standby mode.)</td>
</tr>
<tr>
<td>Green</td>
<td></td>
</tr>
<tr>
<td>Lit</td>
<td>The projector is preparing for projection or in the projection status.</td>
</tr>
</tbody>
</table>

*1 When [LAN (Standby)]/[VGA Out (Standby)]/[In Standby Mode (Audio)] are all set to [Off].
*2 When one or more among [LAN (Standby)]/[VGA Out (Standby)]/[In Standby Mode (Audio)] is/are set to [On].

**Note**

- When the <ON(G)/STANDBY(R)> indicator is flashing in red, the internal fans start to operate and the projector starts cooling.
Powering ON/OFF

Powering On the Projector

1) **Connect the power plug to the power outlet.**
   - Enter Standby status when the <ON(G)/STANDBY(R)> indicator is lighting / flashing in red.

2) **Press the <O/> button on the control panel or the remote control.**
   - When the <ON(G)/STANDBY(R)> indicator lights up in green, the lamp is on.
   - Startup screen is displayed for about 10 seconds, then the image will be projected.

   ![Power On Button](image)

**Note**
- If the power is disconnected due to the power breaker during projection at the last use, ON(G)/STANDBY(R) indicator will light in green automatically at the next startup and the image will be projected.

Powering Off the Projector

1) **Press the <O/> button on the control panel or the remote control.**
   - The following message appears.
   - Message will disappear after about 30 seconds when there is no operation.

   ![Power Off Message](image)

2) **Press the <O/> button again.**
   - The projection stops and the <ON(G)/STANDBY(R)> indicator on the projector flashes up in red. (Fan is still spinning.)

3) **Wait until the <ON(G)/STANDBY(R)> indicator lights / flashes up in red (The fan stops spinning).**
   - The projector enters standby mode when the <ON(G)/STANDBY(R)> indicator lights / flashes up in red.

   ![Power Off Status](image)

**Note**
- Do not turn on the power and project images immediately after turning the projector off. Turning on the power while the lamp is still hot may shorten the lamp life.
- Make sure that the projector is cool enough if you want to pack it for transportation and storage.
Projecting

Check the connections of the peripheral devices and connection of the power cord (page 28) and switch on the power (page 30) to start the projector. Select the image and adjust the state of the image.

Selecting the input signal

Select an input signal.

Press <INPUT> button on the control panel or the <INPUT>, <COMPUTER>, <HDMI>, <VIDEO>, <S-VIDEO> on the remote control.

- The image of the signal being input in the selected terminal is projected.
- Press <INPUT> button to display the [Source] menu. Press ▲▼ to select the desired input and press ► to enter.

How to adjust the state of the image

1) Adjust the projection angle.
   - Place the projector parallel to the screen, and then install it on a flat surface so that the screen becomes rectangle.
   - If the image is tilted lower than the screen, extend the adjustable feet to make a rectangle screen.
   - For details, see “Adjusting the Projector’s Height” (page 24).

2) Adjust the focus.
   - Turn “Focus Ring” to adjust the image.

Note
- It is recommended that the images are projected continuously for at least 30 minutes before the focus is adjusted.
- If keystone distortion occurs, see [V Keystone] in the [Position] menu (page 39).
Viewing 3D Images

About viewing 3D images

The projector can display 3D video signals that are input by the [Frame Packing], [Side-by-Side(Half)], [Top and Bottom], [Frame Sequential] and [Field Sequential] methods. You are required to prepare external devices for viewing 3D video (such as 3D eyewear, video signal output devices) which are suitable for your 3D system. For connections of the projector and external devices, see the instructions of external devices you use. Refer to “3D compatible signals” (page 69) for the types of 3D video signals that can be used with the projector. This projector supports the 3D glass of DLP Link method. However, Panasonic do not guarantee this projector supports the 3D glass from other companies.

Viewing 3D images

You can use the projector to view 3D videos by playing Blu-ray 3D compatible discs on a 3D Blu-ray player.

1) Wearing the 3D Eyewear
   ● Switches on the 3D Eyewear power.

2) View
   ● The projecting image will change according to the setting of the [3D] menu. When it is set to [Auto], the projector will automatically determine the 3D method of the input video signals. When it is set to [On], it will compulsory display the determined 3D method in the [3D Format] menu. For viewing 3D images, see [3D] in the [3D] menu. (page 45)
   ● If the 3D images are not displayed correctly or the images cause discomfort, the images can be adjusted by [3D Invert] and [3D Format].

3) After Use
   ● Switches off the 3D Eyewear power.

Attention
● Before viewing 3D images, please read [VIEWING 3D IMAGES] in [Read this first]. (page 6)
● When using 3D Eyewear, also see the operating instructions of the 3D Eyewear.
● When 3D Eyewear is used indoors with fluorescent lights on, the light may appear to flicker and the 3D image may not display normally. In such case, turn off the fluorescent lights.
● It may be difficult to view other displays (such as the computer screen, digital clock, calculators etc.) while wearing the 3D Eyewear. Remove the 3D Eyewear when viewing other than 3D videos.

Note
● When using 3D glass to view 3D images, it is necessary to synchronize to the following frequency according to the vertical scanning frequency of each 3D video signal. Please refer to each manufacturer for the specifications of the 3D glass.

<table>
<thead>
<tr>
<th>Vertical frequency</th>

On-screen Display Menus

How to operate menu

Operation steps

1) Press <MENU> button on the remote control or on the control panel.
   ● Main Menu displays.

2) Use ▲▼ to select any item in the Main Menu.
   ● The selected item is highlighted in orange.

3) Press ►.
   ● Items in the Sub Menu can be selected.

4) Use ▲▼ to select any item in the Sub Menu.
   ● The selected item is highlighted in yellow.

5) Press ► to display adjusting box.

6) Use ▲▼ to switch or adjust all settings.

7) Press <MENU> button to go back to the Sub Menu and press again to go back to the Main Menu, press <MENU> button once more to close the Main Menu.

Note
● Some items may not be adjusted or used for certain signal formats input to the projector. The MENU items that cannot be adjusted or used are shown in gray characters, and they cannot be selected.
● Some items can be adjusted even if signals are not input.
● If there is no operation to the projector for about 30 seconds, the Menu screen and the adjusting screen will disappear automatically.
● See pages 34 and 35 for details on the items of Sub Menu.

**Note**

- Please note that the on-screen display (OSD) menus vary according to the signal type selected and the projector model you are using.
- [Sharpness], [Saturation] and [Hue] are only supported in Video mode.
Select [Picture] from the Main Menu (see “How to operate menu” on page 33) and then select the item from the Sub Menu.

**Color Mode**

There are many factory presets optimized for various types of images.

1) Press ▲▼ to select [Color Mode].
2) Press ► to display the choosing dialog box.
3) Press ◄► to select the desired item.

- **Dynamic** For bright room.
- **PC** For computer or notebook.
- **Movie** For home theater.
- **Game** For amusing games.
- **User** For user's favorite image mode.

**Note**
- When [Dynamic], [PC], [Movie] or [Game] is selected, the value of [Brightness], [Contrast], [Sharpness], [Saturation], [Hue], [Gamma], [Color Temp] will be fixed.
- When [Brightness], [Contrast], [Sharpness], [Saturation], [Hue], [Gamma], [Color Temp] is adjusted, [Color Mode] will change to [User].
- The value of [User] depends on the type of the input signal.
- Video, S-video, 480i/576i, 480p/576p, 720p, 1080i, 1080p, RGB, HDMI (YUV), HDMI (RGB).
- When selecting [Auto] in the [3D] menu and inputting 3D signal or when [3D] is set to [On], [Color Mode] will be in gray and can not be operated. Items that are not in gray can be adjusted.

**Wall color**

Select an appropriate color for wall projection.

1) Press ▲▼ to select [Wall color].
2) Press ► to display the choosing dialog box.
3) Press ◄► to select the desired item.

- **White** For White color.
- **Light Yellow** For Light Yellow color.
- **Light Blue** For Light Blue color.
- **Pink** For Pink color.
- **Dark Green** For Dark Green color.

**Brightness**

You can adjust the dark (black) part of the projected image.

1) Press ▲▼ to select [Brightness].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust the setting value.

<table>
<thead>
<tr>
<th>Operation</th>
<th>Adjustment</th>
<th>Adjustment range</th>
</tr>

<tbody>
<tr>
<td>Press ►.</td>
<td>Increases the brightness of the dark (black) parts of the screen.</td>
<td>Maximum value 100</td>
</tr>
<tr>
<td>Press ◄.</td>
<td>Reduces the brightness of the dark (black) parts of the screen.</td>
<td>Minimum value 0</td>
</tr>
</tbody>
</table>

**Contrast**

You can adjust the contrast of the colors.

1) Press ▲▼ to select [Contrast].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust the setting value.

<table>
<thead>
<tr>
<th>Operation</th>
<th>Adjustment</th>
<th>Adjustment range</th>
</tr>

<tbody>
<tr>
<td>Press ►.</td>
<td>Brightens the screen and makes the color of image deeper.</td>
<td>Maximum value 100</td>
</tr>
<tr>
<td>Press ◄.</td>
<td>Darkens the screen and makes the color of image lighter.</td>
<td>Minimum value 0</td>
</tr>
</tbody>
</table>
**Sharpness**

You can adjust the sharpness of the projected image.

1) Press ▲▼ to select [Sharpness].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust the setting value.

<table>
<thead>
<tr>
<th>Operation</th>
<th>Adjustment</th>
<th>Adjustment range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press ►.</td>
<td>Contours become sharper.</td>
<td>Maximum value 31</td>
</tr>
<tr>
<td>Press ◄.</td>
<td>Contours become softer.</td>
<td>Minimum value 0</td>
</tr>
</tbody>
</table>

**Note**
- During Video input signal, [Sharpness] can be adjusted.

**Saturation**

Adjust a video image from black and white to fully saturated color.

1) Press ▲▼ to select [Saturation].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust the setting value.

<table>
<thead>
<tr>
<th>Operation</th>
<th>Adjustment</th>
<th>Adjustment range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press ►.</td>
<td>Increase the intensity of the color.</td>
<td>Maximum value 100</td>
</tr>
<tr>
<td>Press ◄.</td>
<td>Decrease the intensity of the color.</td>
<td>Minimum value 0</td>
</tr>
</tbody>
</table>

**Note**
- During Video input signal, [Saturation] can be adjusted.

**Hue**

Adjust the skin tone.

1) Press ▲▼ to select [Hue].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust the setting value.

<table>
<thead>
<tr>
<th>Operation</th>
<th>Adjustment</th>
<th>Adjustment range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press ►.</td>
<td>Adjust the skin tone to be green.</td>
<td>Maximum value 100</td>
</tr>
<tr>
<td>Press ◄.</td>
<td>Adjust the skin tone to be red.</td>
<td>Minimum value 0</td>
</tr>
</tbody>
</table>

**Note**
- During Video input signal and when the color mode is NTSC or NTSC 4.43, [Hue] can be adjusted.

**Gamma**

Adjust the gamma table when the dark areas or bright areas of the image is not clear.

1) Press ▲▼ to select [Gamma].
2) Press ► to display the adjustment dialog box.
3) Press ◄ ► to adjust the setting value.

<table>
<thead>
<tr>
<th>Operation</th>
<th>Adjustment</th>
<th>Adjustment range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press ►.</td>
<td>Emphasize detail in dark areas of image.</td>
<td>Maximum value +3</td>
</tr>
<tr>
<td>Press ◄.</td>
<td>Emphasize detail in bright areas of image.</td>
<td>Minimum value 0</td>
</tr>
</tbody>
</table>

**Color Temp**

Select the color temperature.

1) Press ▲▼ to select [Color Temp].
2) Press ► to display the choosing dialog box.
3) Press ◄ ► to select the desired item.

<table>
<thead>
<tr>
<th>Low</th>
<th>The screen looks warmer.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mid</td>
<td>The medium color temperature.</td>

<tr>
<td>High</td>
<td>The screen looks colder.</td>
</tr>
</tbody>
</table>

**Note**
- When selecting [Auto] in the [3D] menu and inputting 3D signal or when [3D] is set to [On], [Color Temp] will be in gray and can not be operated.

**Color Space**

Select an appropriate color matrix type from Auto, RGB or YUV.

1) Press ▲▼ to select [Color Space].
2) Press ► to display the choosing dialog box.
3) Press ◄ ► to select the desired item.

<table>
<thead>
<tr>
<th>Auto</th>
<th>Switched automatically according to the input signal.</th>
</tr>
</thead>
<tbody>
<tr>
<td>RGB</td>
<td>For computer input.</td>
</tr>
<tr>
<td>YUV</td>
<td>For component input.</td>
</tr>
</tbody>
</table>

**Note**
- During Video or S-video input signal, [Color Space] will be in gray and can not be operated.
Position

Select [Position] from the Main Menu (see “How to operate menu” on page 33) and then select the item from the Sub Menu.

Aspect Ratio

Use this function to choose your desired aspect ratio.
1) Press ▲▼ to select [Aspect Ratio].
2) Press ► to display the choosing dialog box.
3) Press ◄► to select the desired item.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>The projector identifies the video ID (VID) embedded in the image signals and displays the image by automatically switching the screen sizes between 4:3 and 16:9.</td>
</tr>
<tr>
<td>4:3</td>
<td>When standard signals<em>1 are input, the pictures are displayed without changing the aspect ratio. When wide-screen signals</em>2 are input, the pictures are displayed with the aspect ratio converted to 4:3.</td>
</tr>
<tr>
<td>16:9</td>
<td>When standard signals<em>1 are input, the pictures are displayed with the aspect ratio converted to 16:9. When wide-screen signals</em>2 are input, the pictures are displayed without changing the aspect ratio.</td>
</tr>
<tr>
<td>16:10</td>
<td>This format is for 16:10 input sources, like wide screen laptop.</td>
</tr>
</tbody>
</table>

*1: Standard signals are input signals with an aspect ratio of 4:3 or 5:4.
*2: Wide-screen signals are input signals with an aspect ratio of 16:10, 16:9, 15:9 or 15:10.

Note
- If an aspect ratio which is different from the aspect ratio for the input signals is selected, the pictures will appear differently from the originals. Be careful of this when selecting the aspect ratio.
- If using this projector in places such as cafes or hotels to display programs for a commercial purpose or for public presentation, note that adjusting the aspect ratio or using the zoom function to change the screen pictures may be an infringement of the rights of the original copyright owner for that program under copyright protection laws. Take care when using a function of the projector such as the aspect ratio adjustment, zoom function, etc.
- If conventional (normal) 4:3 pictures which are not wide-screen pictures are displayed on a wide screen, the edges of the pictures may not be visible or they may become distorted. Such pictures should be viewed as with an aspect ratio of 4:3 in the original format intended by the creator of the pictures.

Phase

Adjust to achieve an optimal image when there is a flickering image.
1) Press ▲▼ to select [Phase].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust the level.

Note
- During Computer input signal, [Phase] can be adjusted.

Clock

Adjust to achieve an optimal image when there is a vertical flicker in the image.
1) Press ▲▼ to select [Clock].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust the level.

Note
- During Computer input signal, [Clock] can be adjusted.

H Position

Shift the projected image position horizontally.
1) Press ▲▼ to select [H Position].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust the level.

Note
- During Computer input signal, [H Position] can be adjusted.
## V Position

Shift the projected image position vertically.

1) Press ▲▼ to select [V Position].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust the level.

**Note**
- During Computer input signal, [V Position] can be adjusted.

## Digital Zoom

Adjust the magnification of the image. Magnification can be set from 1.0x to 2.0x in 0.1 increments.

1) Press ▲▼ to select [Digital Zoom].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust the level.

**Note**
- When the [Digital Zoom] is in the enlarge status, exits the menu screen and the [Zoom] picture will display at the bottom left of the screen. This indicates the zoom function is in use.
- Under the enlarge status, press ▲▼◄► to move the enlarged image.
- If the input signal is changed under the enlarge status, the magnification of [Digital Zoom] will be reset.

## V Keystone

This function is used to adjust keystone distortion of the projected image.

1) Press ▲▼ to select [V Keystone].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust the level.

- Use the <KEYSTONE+/-> (▲▼) buttons on the remote control to adjust.

## Ceiling Mount

This function is used to project the image from a ceiling-mounted projector.

1) Press ▲▼ to select [Ceiling Mount].
2) Press ► to display the choosing dialog box.
3) Press ◄► to select the desired item.

<table>
<thead>
<tr>
<th>Operation</th>

</tr>
</tbody>
</table>

Note

- The closed caption is mainly used in the north America. This function shows the text information contained in the image signal. Captions may not be displayed on some devices or software.
- You can select [Closed Caption] only when NTSC signal is input.
- When Menu screen is displayed, the caption will not be displayed.
- Part of Closed caption may not be displayed when high compensation values are set in [V Keystone].

**VGA Out (Standby)**

When in standby mode, choose whether to output the signal from <COMPUTER 1> to <MONITOR OUT> terminal.

1) Press ▲▼ to select [VGA Out (Standby)].
2) Press ► to display the setting dialog box.
3) Press ◄► to switch [On]/[Off].

<table>
<thead>
<tr>
<th>VGA Out (Standby)</th>

</tr>
</tbody>
</table>

**Closed Caption**

[Only for NTSC input].

1) Press ▲▼ to select [Closed Caption].
2) Press ► to display the setting dialog box.
3) Press ◄► to select the desired item.
Test Pattern

Use this function to display built-in test pattern when installing the projector.

1) Press ▲▼ to select [Test Pattern].
2) Press ► to display the setting dialog box.
3) Press ◄► to switch [On]/[Off].
   • If you want to return the normal mode to the previous image, set [Test Pattern] to [Off] in the [Setting] menu.

<table>
<thead>
<tr>
<th>On</th>
<th>Display the built-in Test Pattern.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Disable the function.</td>
</tr>
</tbody>
</table>

Remote ID

When you use the system with multiple projectors, you can operate all the projectors simultaneously or each projector individually using single remote control, if a unique ID number is assigned to each projector. There are 7 different remote control IDs: [All], [ID1]~[ID6].

1) Press ▲▼ to select [Remote ID].
2) Press ► to display the setting dialog box.
3) Press ◄► to select the desired item.

Attention
• When operating the projector under [All] code, you can operate several projectors at the same time.
• If you want to control the projector with a specified remote control ID, make sure the remote control ID on the remote control fit to the remote control ID on the projector. (► page 19)

Startup Logo

Set this function to display the Panasonic logo when the projector is turning on.

1) Press ▲▼ to select [Startup Logo].
2) Press ► to display the setting dialog box.
3) Press ◄► to switch [On]/[Off].

<table>
<thead>
<tr>
<th>On</th>
<th>The logo will display when the projector is turning on.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>The logo will not display when the projector is turning on.</td>
</tr>
</tbody>
</table>

Reset

Return all data that has been set in the menu to the factory defaults.

1) Press ▲▼ to select [Reset].
2) Press ► to display the setting dialog box.
3) Press ▲▼ to select Yes.
4) Press ► to execute.

Note
• Lamp used time has been set by user in the [Security] menu will not be reset.
Audio

Select [Audio] from the Main Menu (see “How to operate menu” on page 33) and then select the item from the Sub Menu.

Mute
Temporarily turn off the sound.
1) Press ▲▼ to select [Mute].
2) Press ► to display the setting dialog box.
3) Press ◄► to switch [On]/[Off].

<table>
<thead>
<tr>
<th>Operation</th>
<th>Adjustment</th>
<th>Adjustment range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press ►.</td>
<td>Turn up the volume</td>
<td>Maximum value 32</td>
</tr>
<tr>
<td>Press ◄.</td>
<td>Turn down the volume</td>
<td>Minimum value 0</td>
</tr>
</tbody>
</table>

Note
- Press <MUTE> button on the remote control can also turn on/off the sound.

Volume
Adjust the volume.
1) Press ▲▼ to select [Volume].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust the volume.

In Standby Mode (Audio)
This function is used to switch the output sound On/Off at standby mode.

1) Press ▲▼ to select [In Standby Mode (Audio)].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to switch [On]/[Off].

<table>
<thead>
<tr>
<th>Operation</th>
<th>Adjustment</th>
<th>Adjustment range</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Output audio when in Standby mode.</td>
<td></td>
</tr>
<tr>
<td>Off</td>
<td>Mute the sound when in Standby mode.</td>
<td></td>
</tr>
</tbody>
</table>

Note
- When setting the [In Standby Mode (Audio)] function to [On] and in Standby mode status, the sound of the selected input source can be output from the <AUDIO OUT (VARIABLE)>.
- When setting the [In Standby Mode (Audio)] function to [On] and in Standby mode status, use remote control to switch input sources, sound volume can be adjusted with <VOLUME +/-> buttons on the remote control.
- When the projector changes from projection status to standby status, the sound of Computer 1 input will be the default output sound in spite of the selected input during projection. Press the source buttons on the remote control to switch to different sound.
- The sound of HDMI does not output even if the [In Standby Mode (Audio)] is set to [On].
Select [Options] from the Main Menu (see “How to operate menu” on page 33) and then select the item from the Sub Menu.

Auto Source
Set the automatic signal search function when power on or the source of the signal being received is lost.

1) Press ▲▼ to select [Auto Source].
2) Press ► to display the setting dialog box.
3) Press ◄► to switch [On]/[Off].

- **On**: It will automatically search and display the signal sources marked in the [Input] when power on or the source of the signal being received is lost.
- **Off**: When the source of the signal being received is lost, it will not search other sources.

- Search and display order: [Computer 1] → [Computer 2] → [HDMI] → [Video] → [S-Video] → [Computer 1] →….

Input
Set the automatic search signal source for [Auto Source].

1) Press ▲▼ to select [Input].
2) Press ► to display the setting dialog box.
3) Press ◄► to select the input you want to search and press ►.

- The input with a check mark will be able to be searched when [Auto Source] is set to [On].
- To remove the check mark, choose the desired item and press ►.

Auto Power Off (Min)
Set the time to automatically turn off the projector when there is no signal input.

1) Press ▲▼ to select [Auto Power Off (Min)].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to adjust off timer (min).
   - When this function is set to [0 (min)], it is disable.
   - You can set the time in 5 minutes intervals and the longest set time is 120 minutes.

Note
- 60 seconds before the auto power off, the countdown screen will appear. During countdown, the screen will disappear if there is signal input or operation to the projector.

Lamp Settings
Displays and sets detail of the lamp settings.

1) Press ▲▼ to select [Lamp Settings].
2) Press ► to display the setting dialog box.

- **Lamp Hours Used (Normal)**
  - Displays the used lamp hours under [Normal] lamp power mode.

- **Lamp Hours Used (ECO)**
  - Displays the used lamp hours under [ECO] lamp power mode.

- **Lamp Life Reminder**
  1) Press ▲▼ to select [Lamp Life Reminder].
  2) Press ► to display the setting dialog box.
  3) Press ◄► to switch [On]/[Off].

- **On**: Displays the lamp warning message. (☞ page 58)
- **Off**: The warning lamp message will not be displayed.
Options

**Lamp Power Mode**
- Selects desired lamp power mode under different situations.
1) Press ▲▼ to select [Lamp Power Mode].
2) Press ► to display the setting dialog box.
3) Press ◄► to select the desired item.

<table>
<thead>
<tr>
<th>Normal</th>
<th>Normal brightness.</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO</td>
<td>Lower brightness reduces the lamp power consumption and extends the lamp life.</td>
</tr>
</tbody>
</table>

**Note**
- When set to [ECO], you can extend the power savings, reduced operating noise, the service life of the lamp.
- When there is no signal for more than 5 minutes, the lamp power will be decreased automatically for power saving.

**Clear Lamp Hours**
- Reset the lamp usage time after replacing the lamp unit.
1) Press ▲▼ to select [Clear Lamp Hours].
2) Press ► to display the setting dialog box.
3) Press ▲▼ to switch [Yes]/[No].
4) Press ► to execute.

**Dynamic Black**
Use this function to emphasize detail of dark areas of the image.
1) Press ▲▼ to select [Dynamic Black].
2) Press ► to display the setting dialog box.
3) Press ◄► to switch [On]/[Off].

<table>
<thead>
<tr>
<th>On</th>
<th>Emphasizes detail of dark areas of the image.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Displays with normal quality.</td>
</tr>
</tbody>
</table>

**Note**
- [Dynamic Black] will be gray out and can not be operated when [Picture mode] is set to other mode except [Movie].

**High Altitude**
Set to [On] when the projector is used at elevation approx. 1 000 m (3 300 ft) and approx. 3 000 m (10 000 ft).
1) Press ▲▼ to select [High Altitude].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to switch [On]/[Off].

<table>
<thead>
<tr>
<th>On</th>
<th>For the elevation approx. 1 000 m (3 300 ft) and approx. 3 000 m (10 000 ft).</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>For the elevation below approx. 1 000 m (3 300 ft).</td>
</tr>
</tbody>
</table>

**Note**
- When [On] is selected, the speed and the noise of the fan will increase.

**Dust Filter Reminder**
Set the cleaning cycle of the filters and reset the use time of the filters.
1) Press ▲▼ to select [Dust Filter Reminder].
2) Press ► to display the setting dialog box.

**Filters Remind (Hour)**
- Set the timer to display the Dust Filter Reminder message (page 55).
1) Press ▲▼ to select [Filter Remind].
2) Press ► to display the adjustment dialog box.
3) Press ◄► to set the time.
- The factory default is 0 hour.
- You can set the time in 50 hours intervals and the longest set time is 1000 hours.

**Cleaning up Reminder**
- Reset the air filter used time to zero.
- Reset the air filter hour counter after cleaning or replacing the dust filter.
1) Press ▲▼ to select [Cleaning up Reminder].
2) Press ► to display the setting dialog box.
3) Press ▲▼ to switch [Yes]/[No].
4) Press ► to execute.

**Note**
- It is recommended to clean the air filters regularly every 500 hours of usage.

**Information**
Displays the input signal source and setting state information of the projector.
1) Press ▲▼ to select [Information].
2) Press ► to display the information dialog box.
- Displays [Model Name], [Source], [Resolution], [Software Version], [Color Space] and [Aspect Ratio].
Select [3D] from the Main Menu (see “How to operate menu” on page 33) and then select the item from the Sub Menu.

3D

Use this function to set the display mode of the 3D image.

1) Press ▲▼ to select [3D].
2) Press ► to display the setting dialog box.
3) Press ◄► to switch.

### 3D Invert
Flips the timing of the switch between the left and right of an image to display. Change the setting if the 3D images you see appear strange.

1) Press ▲▼ to select [3D Invert].
2) Press ► to display the setting dialog box.
3) Press ◄► to switch [On]/[Off].

<table>
<thead>
<tr>
<th></th>
<th>Description</th>
</tr>

<tr>
<td>Frame Sequential</td>
<td>Displays the Frame Sequential 3D image in spite of the input signal format.</td>
</tr>
<tr>
<td>Field Sequential</td>
<td>Displays the Field Sequential 3D image in spite of the input signal format.</td>
</tr>
</tbody>
</table>

**Note**
- Compatible 3D source, 3D content and active shutter eyewear are required for 3D viewing.
- When [3D] is set to [On], [Picture] menu will change to 3D settings in spite of the input image signal, and [Color Mode] or [Color Temp] cannot be adjusted.
- Even if the signal is input to <HDMI IN> terminal, when the signal does not have 3D video format, the 3D video is not displayed correctly when [3D] menu is set to [Auto]. In this case, set [3D] menu to [On] and then select the desired 3D video format in [3D Format] menu.
- If the screen is flickering abnormally, set [3D] menu to [Auto] and also check the [3D Format] settings.

**Attention**
- When viewing 3D contents, see detail cations about [VIEWING 3D IMAGES] (page 6).
3D

1080p@24

Use this function to select 96Hz or 144Hz when viewing 1080p/24 signal according to the signal of the external equipment.

1) Press ▲▼ to select [1080p@24].
2) Press ► to display the setting dialog box.
3) Press ◄► to switch.

<p>| | |</p>
<table>
<thead>
<tr>

<tr>
<td>Off</td>
<td>Hides safety precaution messages related to 3D viewing when the projector is switched on.</td>
</tr>
</tbody>
</table>

Attention

● When 3D images are viewed by unspecified number of people for commercial use, display safety precaution messages related to 3D viewing to notify viewers.

Note

● The message of [3D SAFETY PRECAUTIONS] will appear for about 2 minutes. Press <MENU> button to clear the message during message displaying.

Safety Precautions

Show safety precaution messages related to 3D viewing.

1) Press ▲▼ to select [Safety Precautions].
2) Press ► to display the message dialog box.
   ● The [3D SAFETY PRECAUTIONS] message is displayed.
Select [LAN] from the Main Menu (see “How to operate menu” on page 33) and then select the item from the Sub Menu.

Note
- The following settings are set before the projector leaves the factory.

### DHCP
- **DHCP**: Off
- **IP address**: 192.168.10.100
- **Subnet Mask**: 255.255.255.0
- **Gateway**: 192.168.10.1
- **DNS**: NONE

If you want to use a DHCP server, please make sure that the DHCP server is enabled.
For more information about the IP Address, Subnet Mask, Gateway, and DNS, please contact your network administrator.

### DHCP
Set whether to use DHCP server.

1) **Press ▲▼ to select [DHCP].**
2) **Press ► to display the setting dialog box.**
3) **Press ▲▼ to switch [On]/[Off].**
   - Press <MENU> button to exit the switching and go back to the previous menu.
4) **Press ► to confirm.**
   - After selecting [On], the message about LAN restarting will be displayed. The setting of DHCP finishes when the message disappears.
5) **Press <MENU> to exit.**

### IP Address
Select an IP Address of projector connected to network.
1) **Press ▲▼ to select [IP Address].**
2) **Press ► to display the setting dialog box.**
3) **Press ▲▼◄► to input digit numbers.**
4) **Press <MENU> to exit.**

### Subnet Mask
Select Subnet Mask of projector for network connection.
1) **Press ▲▼ to select [Subnet Mask].**
2) **Press ► to display the setting dialog box.**
3) **Press ▲▼◄► to input digit numbers.**
4) **Press <MENU> to exit.**

### Gateway
Select Gateway of projector for network connection.
1) **Press ▲▼ to select [Gateway].**
2) **Press ► to display the setting dialog box.**
3) **Press ▲▼◄► to input digit numbers.**
4) **Press <MENU> to exit.**

### DNS
Select DNS of projector for network connection.
1) **Press ▲▼ to select [DNS].**
2) **Press ► to display the setting dialog box.**
3) **Press ▲▼◄► to input digit numbers.**
4) **Press <MENU> to exit.**
LAN

**Store**
Save the network settings.
1) Press ▲▼ to select [Store].
2) Press ► to display the setting dialog box.
3) Press ▲▼ to switch [Yes]/[No].
4) Press ► to execute.
5) Press <MENU> to exit.

**Reset**
Return all data that has been set in the [Setting] menu to the factory defaults.
1) Press ▲▼ to select [Reset].
2) Press ► to display the setting dialog box.
3) Press ▲▼ to switch [Yes]/[No].
4) Press ► to execute.
   - Select [Yes] to start executing and the resting message appears. The reset procedure finishes when the message disappears.
Connect to Network

The projector has a network function, and the following operations are available from the computer using the web browser control.

- Setting and adjustment of the projector.
- Display of the projector status.
- Transmission of an E-mail message when there is a problem with the projector.

This projector supports "Crestron RoomView" and the following application software from Crestron company. (page 53)

- RoomView Express

Attention

- Connects LAN to indoor equipment.
- The positions of the <COMPUTER 1 IN> and <LAN> terminals are close to each other. Therefore, when connecting cables to both terminals, removing the cable connected to the <LAN> terminal may be difficult. When removing the cable connected to the <LAN> terminal, remove the cable connected to the <COMPUTER 1 IN> terminal beforehand.

Note

- A LAN cable is required to use the wired LAN function.

![Diagram of network setup]

- A Web browser is required to use this function. Confirm that the Web browser can be used beforehand.
  - Compatible Web Browser : Internet Explorer 7.0/8.0/9.0, Safari 4.0/5.0 (Mac OS)
- Communication with an E-mail server is required to use the E-mail function. Confirm that the E-mail can be used beforehand.
- Use shielded LAN cable (STP cable) that is compatible with category 5 or above.
- Use a LAN cable with length of 100m or shorter.

Name and function of network function parts

1. LINK lamp (yellow)
   - Lights on when connected.

2. LAN terminal (10BASE-T/100BASE-TX)
   - Used to connect the LAN cable here.

3. ACT lamp (green)
   - Blinks when transmitting/receiving data.
LAN

Computer operation via network

Connection can be made with wired LAN. However, confirm to your system administrator on network settings before changing any settings.

1) Turn on the computer.

2) Make the network setting according to your system administrator.

If the projector settings are the default settings (page 47), the computer can be used with the following network settings.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>DHCP</td>
<td>Off</td>
</tr>
<tr>
<td>IP address</td>
<td>192.168.10.101</td>
</tr>
<tr>
<td>Subnet Mask</td>
<td>255.255.255.0</td>
</tr>
<tr>
<td>Gateway</td>
<td>192.168.10.1</td>
</tr>
<tr>
<td>DNS</td>
<td>NONE</td>
</tr>
</tbody>
</table>

Web Management

1) Start the WEB browser of the computer.

2) URL input box of the WEB browser and the IP Address setting of the projector.

3) Enter password.
   - Input the administrator password. (page 52)

4) Click Login button.
   - Display [Projector Information] page.

   - Select page menu on the left to display detail page.

Note

- For security reason, set an administrator password for the Web Management and restrict the users who can log in. (page 52)
- Network connection will be disconnected when you cut off the power, such as unplug the power cord. When you want to operate the WEB browser after reconnecting the power, please press [F5] on the keyboard to refresh your browser.
Main Menu description

- **Projector Information**
  - Displays basic information of the projector.

- **LAN Settings**
  - Sets the LAN Settings of the projector and press [Save] to store settings.

- **Projector Status and Control**
  - Click this item and the [Projector Status and Control] displays.

- **E-mail Setting**
  - Click this item and the [E-mail Setting] displays.

- **Security Setting**
  - Click this item and the [Security Setting] displays.

**Attention**

- For the security reason, do not enter any information that third party can recognize your location or name, in [Location] and [Administrator] columns.
### Projector Status and Control
Sets the projector status and adjusts Image and Audio controls.

1. **[Projector Status]**
   - Confirm Projector Status.
   - Press [Refresh] button to refresh.
   - Press [Power ON] and [Power OFF] button to operate power status.
   - Set the time for the projector to shut down automatically when there is no signal input in [Power Saving].
   - Confirm the [Alert status] of abnormal conditions.

2. **[Image Control]**
   - Adjust projector image.
   - Use the [AUTO ADJ.] button to adjust image to the best position and size.

3. **[Audio Control]**
   - Adjust projector volume.

### E-mail Setting
Sets E-mail Alert and SMTP Setting and Alert Condition of the projector and press [Save] to store settings.

1. **[E-mail Alert]**
   - Click [Enable] when using the E-mail function.
   - Login [TO], [CC], [From] of the E-mail address to enable the abnormal E-mail notification.
   - You can enter [Subject] information such as the location of the projector that notifies the sender of the E-mail. (up to 30 characters in single byte)

2. **[SMTP Setting]**
   - Login [Out going SMTP server]

3. **[Alert Condition]**
   - Enter [IP Address], [Device ID], [Port] when Crestron RoomView is in use and press [Save]. (page 62)

### Security Setting
Sets a password for the administrator to manage the Web.

1. **[Administrator]**
   - When set the password, click [Enable] and enter both of [New Password] and [Confirm Password] (4 characters in single byte (0~9, A~Z, a~z)), and then click [Submit].

---

**Note**
- The E-mail function of this projector does not compatible with the advanced SMTP server.
Crestron RoomView Control Tool

“Crestron RoomView” is a system developed by Crestron Electronics, Inc. which collectively manage and control multiple system devices connected via the network, from a computer. For details of “Crestron RoomView”, refer to the Crestron Electronics, Inc. website (Provided only in English). http://www.crestron.com/

For the download of “RoomView Express”, refer to the Crestron Electronics, Inc. website (Provided only in English). http://www.crestron.com/getroomview

RoomView Express image example

- The following picture is the start example of the downloaded [RoomView Express] after installation.
- For detail operation, please refer to [RoomView Help File].
About indicator status

If an indicator turns on

If a problem should occur inside the projector, the <TEMP> and/or <LAMP> indicators will inform you. Manage the indicated problems as follow.

Attention
- Before you take a remedial measure, follow the procedure of switching the power off indicated in “Powering off the projector”. (page 30)
- Confirm the status of the power indicated on the <ON(G)/STANDBY(R)> indicator. (page 29)

■ <TEMP> indicator

<table>
<thead>
<tr>

<td>Turn on the projector until the lamp has completely cooled down.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Lamp unit failure; abnormal lamp power; lamp broken</td>
<td>Disconnect the power plug from the power outlet, and contact your dealer.</td>
</tr>
</tbody>
</table>

Note
- When re-start the projector, turn off the projector, unplug the power cord, and then wait 30 seconds or more before reconnecting power.
- If the <TEMP> indicator lights or flashes or the <LAMP> indicator lights despite taking the actions above, plug out the AC power cord, and contact your dealer for repair.
Maintenance/replacement

Before cleaning/replacing the unit

- When you perform maintenance or replacement of the parts, make sure to turn off the power and disconnect the power plug from the wall outlet. (page 28, 30)
- Be sure to observe the procedure “Powering off the projector” (page 30) when performing power supply operation.

Maintenance

- Outer Case
  Wipe off dirt and dust using a soft dry cloth.
  - If the dirt is persistent, soak the cloth with water and wring it thoroughly before wiping. Dry off the projector with a dry cloth.
  - Do not use benzene, thinner, or rubbing alcohol, other solvents, household cleaners. Using them may cause deterioration of the outer case.
  - When using chemical treated dusters, follow its instruction.

- Front glass surface of the lens and the Mirror
  Wipe off the dirt and dust off the front surface of the lens and the Mirror with soft clean cloth.
  - Do not use a cloth that has an abrasive surface or a cloth that is moist, oily, or covered with dust.
  - Do not use excessive force when wiping the lens as it is fragile.

  Attention
  - The lens and the Mirror are made of glass. Impacts or excessive force when wiping may scratch its surface.
  - Please handle with care.

- Air filters
  If too much dust accumulates in the air filter, the internal temperature of the projector can not be maintained at the normal level. Clean the filters after every 500 hours of usage.
  - When the Dust Filter Reminder message is displayed.

  When <TEMP> indicator lights in red and then the projector is turned off automatically.

  1) Turn off the projector, and unplug the AC power cord from the AC outlet.
  2) Clean up the dust on the projector and around the air vents.
  3) Pull down the air filters (side and rear of the projector) straight and slowly.
4) **Clean the air filters.**
   - Vacuum dirt and dust from the air filters.

5) **Install the air filters.**
   - To install the air filters, reverse the previous steps until you hear a "click" sound.

6) **Reset the [Filter Reminder].**
   - Turn on the power and perform [Cleaning up Reminder] in the [Options] menu. (page 44)

**Attention**
- Turn off the power before you clean the air filters.
- Be sure to attach the air filters properly. If you use the projector without attaching the air filters, the projector may be damaged due to the dirt or dust.

**Note**
- If the air filter has been damaged or dust/dirt cannot be removed, please replace it with a new filter.
- The <TEMP> indicator lights up and the warning temperature message displays because of clogging within 500 hours, depending on the using environment. In that case, clean the air filter at short intervals.
- If the spacer (detachable) of the adjustable feet is overlapping at removing the air filter (rear), rotate the spacer with grabbing the knob of the spacer to keep a clearance from the air filter (rear).
Replacing the unit

Air filters
The air filter should be replaced when cleaning is ineffective.
A replacement air filter unit is available separately. (service component)
Contact your dealer for the optional air filters.
Also, please replace the air filters together when replacing the lamp unit.
Air filters (Part Number: Side H518PE28G001, Rear H518PE29G001) are included with the [ET-LAC300 / ET-LAC200] replacement lamp unit.

Replacement of the air filters
1) Turn off the projector, and unplug the AC power cord from the AC outlet.
2) Clean up the dust on the projector and around the air vents.
3) Slowly pull out the air filters from rear and side.

4) Install the new air filters (Replacement air filters).
   ● To install the air filters, reverse the previous steps until you hear a “click” sound.
5) Reset the [Filter Reminder].
   ● Turn on the power and perform [Cleaning up Reminder] in the [Options] menu. (page 44)

Attention
● Turn off the power before you replace the air filters.
● When attaching the air filter unit, make sure that the projector is stable, and work in an environment that is safe, even in the event of the air filter unit dropping.
● Do not operate the projector with the air filter unit removed. Dust may accumulate on the optical elements degrading picture quality.
● Do not put anything into the air vents. Doing so may result in malfunction of the projector.
Maintenance/replacement

**Lamp unit**

The lamp unit is a consumable component. See "When to replace the lamp unit" about the lifespan. It is recommended to ask an authorized engineer to replace the lamp unit. Contact your dealer. Consult your dealer to purchase a replacement lamp unit. (for PT-CW330E / PT-CX300E: ET-LAC300; for PT-CW240E: ET-LAC200)

**CAUTION:**

- Do not replace the lamp unit when it is hot. (Wait at least 1 hour after use.)
  
  The inside of the cover can become very hot, take care to avoid burn injuries.

**Notes on the replacement of the lamp unit**

- The luminous source of the lamp is made of glass and may burst if you hit it against a hard surface or drop it. Please handle with care.
- A Phillips screwdriver is required for replacement of the lamp unit.
- Be careful of hands slip when you using a screwdriver.
- When replacing the lamp unit, be sure to hold it by the base.
- When replacing the lamp because it has stopped illuminating, there is a possibility that the lamp may be broken. If replacing the lamp of a projector which has been installed on the ceiling, you should always assume that the lamp is broken, and you should stand to the side of the lamp cover, not underneath it. Remove the lamp cover gently. Small pieces of glass may fall out when the lamp cover is opened. If pieces of glass get into your eyes or mouth, seek medical advice immediately.
- The lamp contains mercury. Consult your local municipality or your dealer about correct disposal of used lamp units.

**Attention**

- Be sure to use the lamp unit specified.

**Note**

- The part numbers of accessories and separately sold components are subject to change without notice.

**When to replace the lamp unit**

The lamp unit is a consumable component. Brightness decreases according to duration of usage, so periodical replacement of the lamp unit is necessary. The estimated duration before replacement is 3 000 hours for PT-CW330E / PT-CX300E and 3 500 hours for PT-CW240E. However, this may be shortened depending on individual lamp characteristics, usage conditions, and the installation environment. Therefore, it is strongly recommended that a replacement lamp unit be prepared.

When the projection lamp of the projector reaches its end of life, the warning message appears on the screen. Replace the lamp with a new one promptly.

### On screen: Warning Lamp message

<table>
<thead>
<tr>
<th>Model name</th>
<th>Lamp runtime</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PT-CW330E</td>
<td>Over 2 970 hours *</td>
<td>If the lamp is used over 2 970 hours, the warning message will appear. When any button is pressed, the message will disappear.</td>
</tr>
<tr>
<td>PT-CX300E</td>
<td>Over 3 470 hours *</td>
<td>If the lamp is used over 3 470 hours, the warning message will appear. When any button is pressed, the message will disappear.</td>
</tr>
</tbody>
</table>

**Note**

- The lamp replace time, it is necessary to carry the following calculation. Confirm the lamp used time in the [LAMP settings] (page 43).
  
  For PT-CW330E / PT-CX300E
  
  \[
  \text{Lamp use time} = ([\text{Lamp used time (Normal)}] + [\text{Lamp used time (Eco)}] \times 3) \div 4
  \]
  
  For PT-CW240E
  
  \[
  \text{Lamp use time} = ([\text{Lamp used time (Normal)}] + [\text{Lamp used time (Eco)}] \times 3.5) \div 5
  \]
  
- The usage period of 3 000 hours / 3 500 hours is a rough estimate and is not guaranteed.
Replacing the Lamp unit

**Attention**
- When the projector is mounted on a ceiling, do not work with your face close to the projector.
- Attach the lamp unit and the lamp cover securely.
- When you experience difficulty in installing the lamp, remove it and try again. If you use force to install the lamp, the connector may be damaged.

1) Turn off the Power by following the procedure in "Powering off the projector". (☞page 30). Unplug the AC power cord. Wait at least 1 hour and make sure the lamp unit and surroundings are cool.

2) Use a Phillips screwdriver to loosen the two lamp cover screws and open the lamp cover with holding the lamp cover screws.

3) Use a Phillips screwdriver to loosen the two lamp unit screws until the screws turn freely. Hold the used lamp unit by its base, and pull it gently from the projector.

4) Insert the new lamp unit in correct direction. Tighten the two lamp unit screws securely with a Phillips screwdriver.

5) Close the lamp cover, and tighten the two Lamp cover screws securely with a Phillips screwdriver.
   - When installing the lamp cover, make sure the lamp cover falling-prevention rubber not be clamped.

**Reset the Lamp Hours Used**
After replacing the lamp unit, make sure to reset the usage time in the [Clear Lamp Hours] menu. (☞page 44)
# Troubleshooting

Please check following points. For details, see the corresponding pages.

## Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Cause</th>
<th>Reference page</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Messages displays</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Dust Filter Reminder Message:</td>
<td>The usage time of the dust filter is reached. Please clean the dust filters for better performance. This message displays when the projector reached the timer set in the [Filter Reminder (Hour)]. In this case, please clean the air filters or replace them.</td>
<td>55</td>
</tr>
<tr>
<td>• Lamp Warning Message:</td>
<td>Lamp is approaching the end of its useful life Replacement Suggested! The lamp has reached its end of life, please replace it as soon as possible.</td>
<td>58</td>
</tr>
<tr>
<td>• Fan Locked Warning Message:</td>
<td>The projector will switch off automatically. This shows the fan has stopped during projection and the power will be shut off soon. Unplug the power cord from the outlet and contact your dealer for details.</td>
<td>54</td>
</tr>
<tr>
<td>• Temperature Fail Message :</td>
<td>Please: 1. Make sure air in and outlets are not blocked. 2. Make sure the environment temperature is under 40 degree C. The internal temperature is too high and the power will be shut off soon, please confirm the display items.</td>
<td></td>
</tr>
</tbody>
</table>

**Attention**

- Please contact your dealer if the projector still can not be operated normally after following the instructions above.

**Note**

- The <AUTO ADJ.> operation may not optimize the image position or the resolution, depending on the input signal format or the image contents. In this case, switch to a different image and execute <AUTO ADJ.> again.
Appendices

Serial terminal

The serial connector which is on the connector panel of the projector conforms to the RS-232C interface specification, so that the projector can be controlled by a personal computer which is connected to this connector.

■ Connection

## Basic format

Transmission from the computer begins with STX, then the command, parameter, and ETX are sent in this order. Add parameters according to the details of control.

- **STX**
- **C1**
- **C2**
- **C3** : P1 P2 P3 Pn
- **ETX**

*: When sending commands without parameters, a colon (:) is not necessary.

### Basic format (with sub command)

Same as basic format

- **STX**
- **C1**
- **C2**
- **C3** :
- **ETX**

- **S1** S2 S3 S4 S5
- **E**
- **P1** P2 P3 P4 P5 P6

*: When transmitting a command which does not need a parameter, the operation (E) and parameter are not necessary.
## Control commands

When controlling the projector from a computer, the following commands are available:

PJLink security authorization

The password for PJLink is the same as the password for Web Management. (page 52)

When using PJLink without security authorization, set use without the password in Web Management.

For specifications regarding PJLink, refer to the Japan Business Machine and Information System Industries Association website.

http://pjlink.jbmia.or.jp/english/
### List of compatible signals

The following table specifies the types of signals compatible with the projectors.

Format:  
- **V** = VIDEO, **S** = S-VIDEO, **R** = RGB, **Y** = YPbPr, **H** = HDMI

*1: "i" added to the resolution value indicates an interlaced signal.

*2: HDMI signal of 480i and 576i is only supported by 27MHz Dot clock signal.

*3: Where marked "o" signals indicates in Plug and Play is compatible with EDID of projector. Unmarked signals in Plug and Play may also be compliant if input terminals are written in the format list. Where Plug and Play is unmarked and nothing is written in the format list, difficulties in projecting image may occur even when computer and projector appear to have same resolution.

*4: For PT-CW330E and PT-CW240E.

### 3D compatible video signals

</table>

Video and S-Video support DVD software (HQFS) that is recorded in Field sequential.

*1: "i" added to the resolution value indicates an interlaced signal.

**Note**

- The number of display dots is 1 280 x 800 for the PT-CW330E, PT-CW240E and 1 024 x 768 for the PT-CX300E.
- A signal with a different resolution will be projected after converting the resolution to match the projector display.
- When interlaced signals are connected, flicker may occur on the projected image.
- Even the above signals exist, some image signals that recorded in special method may not be displayed.
- The <AUTO ADJ.> operation may not optimize the image position or the resolution, depending on the input signal format or the image contents. In this case, switch to a different image and execute <AUTO ADJ.> again.

Ceiling mount bracket safeguards

Dimensions

<Unit : mm (inch)>

Model No. of ceiling mount bracket:
ET-PKV100H (for high ceilings)
ET-PKV100S (for low ceilings)
Model No. of projector mount base:
ET-PKC200B
Model No. of Wall Mount Bracket:
ET-PKC200W

M4 x 0.7
8 mm (0.32")

Torque: 1.2 ± 0.1 N · m

*: Actual dimension may differ by product.

Installation work of the ceiling mount bracket should only be carried by a qualified technician.
Even if it is during guaranteed period, the manufacturer is not responsible for any hazard or damage caused by using a ceiling mount bracket which is not purchased from an authorized distributors, or environmental conditions.
Remove an unused ceiling mount bracket promptly.
Ensure to use a torque driver and do not use an electrical screwdriver or an impact screwdriver.
For details, see the work instruction manual packed together with the ceiling mount bracket.
The model Nos. of the accessories and the parts sold separately are subject to change without notice.
Make sure the screws on the ceiling mount kit cannot touch the metal parts materials (metallic lath, wire or board) in the ceiling board. Otherwise it may result in fire hazard.

Information for Users on Collection and Disposal of Old Equipment and used Battery

These symbols on the products, packaging, and/or accompanying documents mean that used electrical and electronic products and battery should not be mixed with general household waste. For proper treatment, recovery and recycling of old products and used battery, please take them to applicable collection points, in accordance with your national legislation and the Directives 2002/96/EC and 2006/66/EC.

By disposing of these products and battery correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling.

For more information about collection and recycling of old products and battery, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.

For business users in the European Union
If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

Information on Disposal in other Countries outside the European Union
These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Note for the battery symbol (bottom two symbol examples):
This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.
