Thank you for purchasing a Panasonic Projector.

- Before operating this product, please read the instructions carefully, and save this manual for future use.
- Before using your projector, be sure to read “Precautions with regard to safety” (pages 7 to 11).
- For network operation, please read the Network Operation Manual.
Dear Panasonic Customer:

This instruction booklet provides all the necessary operating information that you might require. We hope it will help you to get the most out of your new product, and that you will be pleased with your Panasonic LCD projector. The serial number of your product may be found on its bottom. You should note it in the space provided below and retain this booklet in case service is required.

**Model number:** PT-LB3E/PT-LB2VE/PT-LB1VE

**Serial number:**

**WARNING:** THIS APPARATUS MUST BE EARTHED.

**WARNING:** To prevent damage which may result in fire or shock hazard, do not expose this appliance to rain or moisture.

Machine Noise Information Ordinance 3. GSGV, January 18, 1991: The sound pressure level at the operator position is equal or less than 70 dB (A) according to ISO7779.
Important Safety Notice (continued)

Information for Users on Collection and Disposal of Old Equipment and used Batteries
These symbols on the products, packaging, and/or accompanying documents mean that used electrical and electronic products and batteries should not be mixed with general household waste.
For proper treatment, recovery and recycling of old products and used batteries, please take them to applicable collection points, in accordance with your national legislation and the Directives 2002/96/EC and 2006/66/EC.
By disposing of these products and batteries correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling.
For more information about collection and recycling of old products and batteries, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.
Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

For business users in the European Union
If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

Information on Disposal in other Countries outside the European Union
These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Note for the battery symbol (bottom two symbol examples):
This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.
**WARNING:**
1. Remove the plug from the wall outlet when this unit is not in use for a prolonged period of time.
2. To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
3. Do not remove the earthing pin on the power plug. This apparatus is equipped with a three prong earthing-type power plug. This plug will only fit an earthing-type wall outlet. This is a safety feature. If you are unable to insert the plug into the wall outlet, contact an electrician. Do not defeat the purpose of the earthing plug.

**CAUTION:** To assure continued compliance, follow the attached installation instructions, which includes using the provided power cord and shielded interface cables when connecting to computer or peripheral device. Any unauthorized changes or modifications to this equipment will void the user’s authority to operate.

Pursuant to at the directive 2004/108/EC, article 9(2)
Pursuant to at the directive 2005/32/EC amended by 2008/28/EC, article 14

</table>
**Longer lamp life**
The lamp replacement cycle is longer than the former model. (⇒ page 47)
- Approx. 3,000 hours (PT-LB90NTE)
- Approx. 5,000 hours (PT-LB3E/PT-LB2VE/PT-LB1VE)

**Standby power reduction**
The standby power has been immensely reduced compared to the previous model.
- Approx. 0.9 W (PT-LB90NTE)
- Approx. 0.4 W (PT-LB3E/PT-LB2VE/PT-LB1VE)
  (Standby mode: In "ECO")

**User logo display function**
You can project your company’s logo when projection starts. (⇒ page 36)
Precautions with regard to safety

**WARNING**

**POWER**

The wall outlet or the circuit breaker shall be installed near the equipment and shall be easily accessible when problems occur. If the following problems occur, cut off the power supply immediately.

- If foreign objects or water get inside the projector, cut off the power supply.
- If the projector is dropped or the cabinet is broken, cut off the power supply.
- If you notice smoke, strange smells or noise coming from the projector, cut off the power supply.

Please contact an Authorized Service Center for repairs, and do not attempt to repair the projector yourself.

**During a thunderstorm, do not touch the projector or the cable.**

Electric shocks can result.

**Do not do anything that might damage the power cord or the power plug.**

- If the power cord is used while damaged, electric shocks, short-circuits or fire will result.
- Do not damage the power cord, make any modifications to it, place it near any hot objects, bend it excessively, twist it, pull it, place heavy objects on top of it or wrap it into a bundle.

Ask an Authorized Service Center to carry out any repairs to the power cord that might be necessary.

**Insert the power plug securely into the wall outlet.**

If the plug is not inserted correctly, electric shocks or overheating will result.

- Do not use anything other than the provided power cord.
- Do not use the provided power cord for other electrical equipment.
- Do not use plugs which are damaged or wall outlets which are coming loose from the wall.

**Clean the power plug regularly to prevent it from becoming covered in dust.**

Failure to observe this will cause a fire.

- If dust builds up on the power plug, the resulting humidity can damage the insulation.
- If not using the projector for an extended period of time, pull the power plug out from the wall outlet.

Pull the power plug out from the wall outlet and wipe it with a dry cloth regularly.

**Do not handle the power plug with wet hands.**

Failure to observe this will result in electric shocks.

**Do not overload the wall outlet.**

If the power supply is overloaded (ex., by using too many adapters), overheating may occur and fire will result.

**ON USE/INSTALLATION**

**Do not place liquid containers on top of the projector.**

If water spills onto the projector or gets inside it, fire or electric shocks will result.

If any water gets inside the projector, contact an Authorized Service Center.

**Do not place the projector on soft materials such as carpets or sponge mats.**

Doing so will cause the projector to overheat, which can cause burns, fire or damage to the projector.

**Do not set up the projector in humid or dusty places or in places where the projector may come into contact with oily smoke or steam, ex. a bathroom.**

Using the projector under such conditions will result in fire, electric shocks or components deterioration. Components deterioration (such as ceiling mount brackets) may cause the projector which is mounted on the ceiling to fall down.

**Do not install this projector in a place which is not strong enough to take the full weight of the projector or on top of a surface which is sloped or unstable.**

Failure to observe this will cause projector to fall down or tip over the projector, and severe injury or damage could result.

**Do not place another projector or other heavy objects on top of the projector.**

Failure to observe this will cause the projector to become unbalanced and fall, which could result in damage or injury. The projector will be damaged or deformed.

**Installation work (such as ceiling suspension) should only be carried out by a qualified technician.**

If installation is not carried out and secured correctly it can cause injury or accidents, such as electric shocks.

- Do not use anything other than an Authorized ceiling mount bracket.

**Do not cover the air inlet port or the air outlet port.**

Doing so will cause the projector to overheat, which can cause fire or damage to the projector.

- Do not place the projector in narrow, badly ventilated places such as closets or bookshelves.
- Do not place the projector on cloth or papers, as these materials could be drawn into the air inlet port.

**Do not place your hands or other objects close to the air outlet port.**

Doing so will cause burns or damage your hands or other objects.

- Heated air comes out of the air outlet port. Do not place your hands or face, or objects which cannot withstand heat close to this port.
Precautions with regard to safety (continued)

Do not look and place your skin into the lights emitted from the lens while the projector is being used.
Doing so can cause burns or loss of sight.
• Strong light is emitted from the projector’s lens. Do not look or place your hands directly into this light.
• Be especially careful not to let young children look into the lens. In addition, turn off the power and disconnect the power plug when you are away from the projector.

Do not insert any foreign objects into the projector.
Doing so will cause fire or electric shocks.
• Do not insert any metal objects or flammable objects into the projector or drop them onto the projector.

Never attempt to remodel or disassemble the projector.
High voltages can cause fire or electric shocks.
For any inspection, adjustment and repair work, please contact an Authorized Service Center.

Do not project an image with the supplied lens cover attached.
Doing so can cause fire.

ACCESSORIES

Do not use or handle the batteries improperly, and refer to the following.
Failure to observe this will cause burns, batteries to leak, overheat, explode or catch fire.
• Do not use unspecified batteries.
• Use manganese batteries but not rechargeable batteries.
• Do not dissemble dry cell batteries.
• Do not heat the batteries or place them into water or fire.
• Do not allow the + and – terminals of the batteries to come into contact with metallic objects such as necklaces or hairpins.
• Do not store batteries together with metallic objects.
• Store the batteries in a plastic bag and keep them away from metallic objects.
• Make sure the polarities (+ and –) are correct when inserting the batteries.
• Do not use a new battery together with an old battery or mix different types of batteries.
• Do not use batteries with the outer cover peeling away or removed.
• Remove the empty batteries from the remote control at once.
• Insulate the battery using tape or something similar before disposal.

Do not allow children to reach the AAA/R03 battery.
• The battery can cause personal injury if swallowed.
• If swallowed, seek medical advice immediately.

If the battery fluid leaks, do not touch it with bare hands, and take the following measures if necessary.
• Battery fluid on your skin or clothing could result in skin inflammation or injury. Rinse with clean water and seek medical advice immediately.
• Battery fluid coming in contact with your eyes could result in loss of sight.
  In this case, do not rub your eyes. Rinse with clean water and seek medical advice immediately.

Do not disassemble the lamp unit.
If the lamp breaks, it could cause injury.

Lamp replacement
The lamp has high internal pressure. If improperly handled, an explosion and severe injury or accidents will result.
• Replacement of the lamp should be carried out by a qualified technician.
• The lamp can easily explode if struck against hard objects or dropped.
• Before replacing the lamp, be sure to disconnect the power plug from the wall outlet.
• Electric shocks or explosions can result if this is not done.
• When replacing the lamp, allow it to cool for at least one hour before handling it otherwise it can cause burns.

Do not allow infants or pets to touch the remote control unit.
• Keep the remote control unit out of the reach of infants and pets after using it.

CAUTION

POWER

When disconnecting the power cord, be sure to hold the power plug and power connector.
If the power cord itself is pulled, the lead will become damaged, and fire, short-circuits or serious electric shocks will result.

When not using the projector for an extended period of time, disconnect the power plug from the wall outlet and remove the batteries from the remote control.

Disconnect the power plug from the wall outlet before carrying out any cleaning.
Electric shocks can result if this is not done.
Precautions with regard to safety (continued)

ON USE/INSTALLATION

Do not put your weight on this projector. You could fall or the projector could break, and injury will result.
- Be especially careful not to let young children stand or sit on the projector.

Do not place the projector in extremely hot locations.
Doing so will cause the outer casing or internal components to deteriorate, or result in fire.
- Take particular care in locations exposed to direct sunlight or near stoves.

Always disconnect all cables before moving the projector.
Moving the projector with cables still attached can damage the cables, which will cause fire or electric shocks to occur.

ACCESSORIES

Do not use the old lamp unit.
If used it could cause lamp explosion.

If the lamp has broken, ventilate the room immediately. Do not touch or bring your face close to the broken pieces.
Failure to observe this will cause the user to absorb the gas which was released when the lamp broke and which contains nearly the same amount of mercury as fluorescent lamps, and the broken pieces will cause injury.
- If you believe that you have absorbed the gas or that the gas has got into your eyes or mouth, seek medical advice immediately.
- Ask your dealer about replacing the lamp unit and check the inside of the projector.

CAUTIONS WHEN TRANSPORTING

When transporting the projector, the leg adjusters must be housed and do not hold them.

When transporting, keep the projector in the provided carrying bag with the lens cover on it.
- Face the lens of the projector in an upward direction and put it gently into the carrying bag.
- Do not put anything other than the projector and its accessories in the carrying bag.

CAUTIONS WHEN INSTALLING

DO NOT USE UNDER THE FOLLOWING CONDITIONS.

- Do not set up the projector outdoors.
The projector is designed for indoor use only.

- Avoid setting up in places which are subject to vibration or shocks.
If the projector is installed in a place where vibrations are transmitted or mounted in a car or a vessel, vibrations or impacts will result in damage to the internal parts, causing failure. Install the product in a place free from vibrations and impacts.

- Avoid setting up in places which are subject to sudden temperature changes, such as near an air conditioner or lighting equipment.
Failure to observe this will result in malfunctions or the lamp life will be shortened.
See “TEMP INDICATOR” on page 45.

- Avoid setting up in places which are near high-voltage power lines or near motors.
The product will be exposed to interference if it is installed in the vicinity of high-voltage electrical power lines or power sources.

- Do not install the projector at elevations higher than 2 700 m (8 858 ft) above sea level.
If using this projector at high elevations 1 400 - 2 700 m (4 593 - 8 858 ft) above sea level, set the HIGH ALTITUDE MODE to ON.
If using this projector at elevations lower than 1 400 m (4 593 ft) above sea level, set the HIGH ALTITUDE MODE to OFF.
Failure to observe this will result in malfunctions or the lamp life or life of other components will be shortened.

BE SURE TO ASK A SPECIALIZED TECHNICIAN WHEN INSTALLING THE PRODUCT TO A CEILING.

If the product is to be installed hanging from the ceiling, purchase an optional hanging attachment (Model No. ET-PKB2). Please call a specialized technician or contact an Authorized Service Center for installation.

LENS FOCUS

Do not adjust the lens focus in the initial period after switching the projector on. The high clarity projector lens is thermally affected by the light from the light source, making the focus unstable in the period just after switching on. Please allow a warm-up time of at least 30 minutes before adjusting the lens focus.
Precautions with regard to safety (continued)

CAUTIONS ON USE

IN ORDER TO GET THE PICTURE QUALITY
Draw curtains or blinds over windows and turn off any lights near the screen to prevent outside light or light from indoor lamps from shining onto the screen. Depending on where the projector is used, air exhaust vents or the warm air from air conditioning can cause a shimmering effect on the screen. For this reason, take care not to shield the air exhaust vents and consider the direction of the air flowing from air conditioning.

DO NOT TOUCH THE SURFACE OF THE PROJECTOR LENS WITH YOUR BARE HAND.
If the surface of the lens becomes dirty from fingerprints or anything else, this will be magnified and projected onto the screen. Please put the standard lens cover on the projector when you do not use it.

DO NOT MOVE THE PROJECTOR WHILE IT IS OPERATING OR SUBJECT IT TO VIBRATION OR IMPACT.
The service life of its internal components will be shortened.

THE PROJECTOR HAS A HIGH PRESSURE MERCURY LAMP THAT IS CHARACTERIZED AS FOLLOWS:
- The brightness of the lamp will decrease over time.
- The lamp may explode or shorten the lamp life by shocks or chipping damage.
- In rare cases, it may burst shortly after the first use.
- The possibility of its bursting increases when the lamp is used beyond the replacement time.
- If the lamp bursts, gas inside the lamp is released in the form of smoke.
- The life of a mercury lamp varies according to the individual difference or conditions of use.
- In particular, turning the power on and off frequently and/or repeatedly as well as continuous use for 10 hours will greatly affect the life cycle. Provide a lamp for replacement in advance.

OPTICAL COMPONENTS
It may be necessary to replace the optical components such as Liquid crystal panels and Polarizing plates in less than 1 year if using the projector in a high temperature environment or in a very dusty, oily smoke or tobacco smoke environment. For more details, please contact your dealer.

LIQUID CRYSTAL PANEL
The Liquid crystal panels are precision-made. Note that in rare cases, pixels of high precision could be missing or always lit, but this is not a malfunction. Do not project the same image for long periods of time, as this may remain as an afterimage on the liquid crystal panel. Display the white screen test pattern for more than an hour to remove it. See “TEST PATTERN” on page 41.

SECURITY

CONNECTION TO EXTERNAL DEVICE
When connecting the projector to a computer or external device, use the power cord supplied with the corresponding device and a commercially available shielded interface cable.
**Precautions with regard to safety (continued)**

**CLEANING AND MAINTENANCE**

**DISPOSAL**

When discarding this product, please contact your local authorities or dealer and ask for the correct method of disposal.

**ASK AN AUTHORIZED SERVICE CENTER TO CLEAN THE INSIDE OF THE PROJECTOR AT LEAST ONCE A YEAR.**

If dust is left to build up inside the projector without being cleaned out, it can result in fire or problems with operation. It is a good idea to clean the inside of the projector before the season when humid weather arrives.

Ask your nearest Authorized Service Center to clean the projector when required.

Please discuss with the Authorized Service Center regarding cleaning costs.

**SUPPLIED ACCESSORIES**

Make sure that the following accessories are provided with your projector.

<table>
<thead>
<tr>
<th>Remote control (×1)  (N2QAYA000011)</th>
<th>Power cord (×1)  (K2CM3YY00015)</th>
<th>RGB signal cable (×1) 1.8 m (5' 10&quot;)  (K1HY15YY0009)</th>

**NOTE:**

- The protectors for the enclosed products, such as a plug cover or foam cartons, must be handled appropriately.
- Contact an Authorized Service Center for any lost accessories.
- Keep the accessories away from children.
- The model Nos. of the accessories and parts sold separately are subject to change without notice.
Start-up display

The LANGUAGE and INITIAL SETTING menu will be displayed when the projector is turned on for the first time or after it has been initialized. ( page 41)

Navigate the DISPLAY OPTION menu to set the menus in accordance to its application and environment settings.

NOTE:
• When the projector is turned on for the first time, you may be required to adjust the “zoom ring” and “focus ring” ( page 13) on the top of the projector body to make the menu screen clearer.
  For details, see POSITION THE IMAGE. ( page 24)

**LANGUAGE**

1  To select the desired language.

2  To proceed to INITIAL SETTING menu.

**INITIAL SETTING**

1  To select the desired menu.

2  To change the settings in the menu.

3  NOTE:
  • To return to LANGUAGE menu, press [RETURN] in INITIAL SETTING menu.

**INSTALLATION**

PROJECTOR’S REMOTE CONTROL

Top and rear view

Installing/removing batteries
Press the tab and lift up the cover. Insert the batteries according to the polarity diagram indicated inside or remove.

Use only manganese batteries.

Front view

1. POWER
Switch between standby mode and projection mode. (⇒ page 22, 23)
2. Display the Main menu. (⇒ page 29)
3. Navigate through the menus with [▲▼◄►] and confirm the selection with [ENTER]. (⇒ page 28)
4. Capture the projected image as a frozen picture. (⇒ page 25)
5. Switch the required input signal button to select. (⇒ page 25)
6. Reset some of the settings to the factory default settings. (⇒ page 26)
7. Control the zoom size. (⇒ page 27)
8. Control speaker volume. (⇒ page 26)
9. Create shortcut assigned to certain selected function. (⇒ page 27, 40)
10. Display frozen image while the display of subsequent images continues. (⇒ page 26)
11. Turn off the projection temporarily. (⇒ page 25)
12. Detect the input signal. Adjust the settings of SHIFT, DOT CLOCK and CLOCK PHASE in the POSITION menu automatically for COMPUTER signals. (⇒ page 25)

NOTE:
- Do not drop the remote control.
- Avoid contact with liquids or moisture.
- Do not attempt to modify or disassemble the remote control.
- Do not let strong light shine onto the signal receptor which will cause a malfunction.
- The remote control operates within the range of 7 m (23’ 0”), approximately ±30 ° vertically and horizontally from the projector avoiding any obstacles.
- The operating range may differ due to the screen material and may not be effective with a translucent screen.
Set up your projector

SCREEN SIZE AND THROW DISTANCE

You can adjust the projection size with 1.2× zoom lens. Calculate and define the throw distance as follows.

(All measurements below are approximate and may differ slightly from the actual measurements.)

<table>
<thead>
<tr>
<th>Projection size</th>
<th>For 4:3 aspect ratio</th>

<td>6.35 m (250&quot;)</td>
<td>8.7 m (28' 6&quot;)</td>
</tr>
<tr>
<td>PT-LB3</td>
<td>7.62 m (300&quot;)</td>
<td>10.5 m (34' 5&quot;)</td>
</tr>
</tbody>
</table>

**NOTE:**
- For best projection image quality, install a screen where sunlight or room lightings do not shine directly onto the screen. Close window shades or curtains to block the light and turn off the lightings.
- Do not use the projector at a raised or horizontally tilted position. It may cause the projector to malfunction. However, you can tilt the projector’s body approximately ±30° vertically and ±10° horizontally.
- Over tilting may result in shortening the component’s life.
- Do not cover the air outlet port and air intake ports or place anything within 50 cm (20") near them as this may cause damage or injury.

You can calculate detailed screen dimensions from the “Screen diagonal”. The unit of all the calculation results is m. (The results below differ slightly from the actual measurements.)

If the projection size is SD,

| Screen height (SH) | SH (m) = SD (m) × 0.6 |
| Screen width (SW) | SW (m) = SD (m) × 0.8 |
| Minimum distance (LW) | PT-LB3 = 1.1496 × SD (m) – 0.025 = 1.2520 × SD (m) – 0.011 |
| PT-LB2V/PT-LB1V = 1.1890 × SD (m) – 0.035 = 1.2992 × SD (m) – 0.041 |
| Maximum distance (LT) | PT-LB3 = 1.3819 × SD (m) – 0.033 = 1.5079 × SD (m) – 0.035 |
| PT-LB2V/PT-LB1V = 1.4094 × SD (m) – 0.035 = 1.5394 × SD (m) – 0.040 |
PROJECTION METHOD

See “INSTALLATION” on page 39 to select the projection method.

- **Put it on a desk or floor and project from the front**
- **Mount it on the ceiling and project from the front**

**NOTE:**
- Use the optional ceiling mount bracket (ET-PKB2) when mounting the projector on the ceiling.
- You can adjust the projection angle in the vertical direction by adjusting the leg adjuster button. (☞ page 24)
Connections

Preparations

• Read and follow the operating instructions of each peripheral device and turn the peripheral devices off prior to making any connections.
• Prepare the selected peripheral devices with the connection cables that correspond to the projector’s terminals.
• All peripheral devices and cables used for the connections are sold separately unless indicated otherwise.
• If the input signal is affected by signal jitter, the projected image may have poor image quality and timebase correction is effective.
• Confirm the types of video signals, see “LIST OF COMPATIBLE SIGNALS”. (☞ page 52)

Example: AV equipment

![Diagram of AV equipment connections]

NOTE:
• Switch the audio connection manually for more than one AV equipment connections.
Connections (continued)

Example: Computers

NOTE:
• When connecting the RGB signal cable, tighten the fixing screws on the D-Sub (15-pin) connector.
• For the network connection between the projector and computers, see "Network Operation Manual" in the CD-ROM provided.
• Only the RGB signal cable (1 piece) is attached. If any other cables are necessary, purchase them from the market.
Turn the projector ON or OFF

POWER CORD

Fix the provided “power cord secure lock” to the power cord on the projector to prevent the cord from coming off.
For details, see “Precautions with regard to safety”. (⇒ pages 7 to 11)

Install the “power cord secure lock”

1 Push the connector all the way into the AC IN terminal ensuring that the shape of the connector matches that of the terminal.

2 Align the side of the “power cord secure lock” with the side of the “Rail guide” of the AC IN terminal and slide it in.

3 Latch to the latch catcher and press until it clicks.

4 Connect the power plug to a wall outlet.

Detach the “power cord secure lock”

1 Unplug the power plug from the wall outlet.

2 Depress the latch and slide off the lock.

3 Slide up the “power cord secure lock” and remove it.

4 Hold the connector firmly and detach it from the AC IN terminal.

Direct power on function

If the power cord is connected to a wall outlet with INITIAL START UP (PROJECTOR SETUP menu) is set to ON, projection will start even when the control panel is disabled. (⇒ page 39)

Direct power off function

You can switch off the electric power supply any time by unplugging the power plug from the wall outlet or by switching off the main power. The internal cooling fan keeps operating using the internal power supply and automatically stops when cooled.

NOTE:
• Do not put the projector into the carrying bag with the POWER indicator lit.
**Turn the projector ON or OFF (continued)**

**POWER INDICATOR**

POWER indicator  
> shows status of the projector’s power

When the TEMPERATURE indicator flashes, the POWER indicator lights red and you cannot turn the projector on.

---

**POWER indicator status**

<table>
<thead>
<tr>
<th>Indicator status</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>No illumination or flashing</td>
<td>No power is supplied and the internal cooling fan is not operating.</td>
</tr>
<tr>
<td>Red</td>
<td>Lit &lt;br&gt; The power is turned off (when STANDBY MODE is set to ECO). If [POWER] button is pressed, projection starts. &lt;br&gt; Flashing &lt;br&gt; The power is turned off (when STANDBY MODE is set to NORMAL). If [POWER] button is pressed, projection starts.</td>
</tr>
<tr>
<td>Green</td>
<td>Flashing &lt;br&gt; The power is on and preparing for projection. &lt;br&gt; Lit &lt;br&gt; The projector is projecting.</td>
</tr>
<tr>
<td>Orange</td>
<td>Lit &lt;br&gt; No power supply and the power is preparing for being turned off. It is turned off (The projection is set in STANDBY MODE) after a while. &lt;br&gt; Flashing &lt;br&gt; The power is switched on again while cooling the lamp and recovering to the projection mode. Recovery may take a while.</td>
</tr>
</tbody>
</table>

NOTE:
- When the power is turned off, the internal fan cools the lamp using internal power supply.
- The power is turned on again while cooling the lamp and recovers to the projection mode. Recovery may take a while.
- While the power is turned off (when STANDBY MODE is set to ECO, the POWER indicator is lit red), power of about 0.4 W is consumed.
Before switching on the projector, make sure all the other devices are correctly connected and remove the Lens cover. (⇒ page 18)

1. Connect the power cord. (⇒ page 20)
   After a while the “power indicator” lights or flashes in red.

2. Press the POWER button.
   - POWER indicator flashes green several times before it lights up and the STARTUP LOGO is displayed. See STARTUP LOGO in DISPLAY OPTION menu. (⇒ page 36)

NOTE:
- Confirm that CONTROL PANEL (when operating with the projector body) or REMOTE CONTROLLER (when operating with the remote control) under CONTROL DEVICE SETUP in the SECURITY menu is set to ENABLE. (⇒ page 44)
- When setting the SECURITY menu, you will be asked to input the password. (⇒ page 42)
- When starting up the projector, some small rattling or tinkling sound may be heard. These are normal and will not affect the performance of the projector.
- When the internal cooling fan is operating, some operational sound may be heard. The loudness of the operational sound depends on the external temperature.
- If INITIAL START UP (PROJECTOR SETUP menu) is set to ON, the projector starts projecting when the power cord is connected to a wall outlet. (⇒ page 39)
- If the projector is turned on again while the internal cooling fan is still operating by the internal power supply, the display may flicker due to the specifications of the lamp. These are normal and will not affect the performance of the projector.
**Turn the projector ON or OFF (continued)**

**TURN THE PROJECTOR OFF**

![Diagram showing POWER indicator]

When operating the projector, check the status of the **POWER** indicator. (☞ page 21)

1. **Press the POWER button.**
   A confirmation screen will be displayed – the screen will go off and return to projection if there is no operation for approximately 10 seconds.

2. **Press the button again.**
   The lamp goes off and the projection stops.
   - The cooling fan continues its rotation and **POWER** indicator lights orange. Wait until the **POWER** indicator turns red.
   - If **STANDBY MODE** is set to **NORMAL**, the **POWER** indicator flashes red. (☞ page 39)

3. **Disconnect the power plug from the wall outlet after the POWER indicator lights or flashes in red. (☞ page 21)**
   - For urgency, you may disconnect the power plug immediately since the **DIRECT POWER OFF** function is installed.

**NOTE:**
- Confirm that **CONTROL PANEL** (when operating with the projector body) or **REMOTE CONTROLLER** (when operating with the remote control) under **CONTROL DEVICE SETUP** in the **SECURITY** menu is set to **ENABLE**. (☞ page 44)
- Power can be turned off by pressing [POWER] for at least 0.5 seconds.
Project an image

**Preparations**
- Confirm the connections of the peripheral devices (page 18, 19) and power cord (page 20).
- Switch on the power (page 22) to start projecting.
- Select the input signal and adjust the image.

**SELECT THE INPUT SIGNAL**

1 **Switch on the connected devices.**
   When playing a connected DVD player, if SIGNAL SEARCH (DISPLAY OPTION menu) is set to ON, the input signal is detected and projected automatically when the projector is switched on. (page 37)
   - Set the INPUT GUIDE (DISPLAY OPTION ➔ ON-SCREEN DISPLAY menu) to DETAILED. If the projector cannot detect any input signal, the “Computer connection guide” will be displayed. (page 35)

2 **Select an input signal.**
   The image selected with any of the [INPUT SELECT] button is projected.

**NOTE:**
- Change the settings in the PICTURE menu according to the connected device for example DVD, video tape, etc., to be played. (page 30)
- Confirm the aspect ratio of the screen and image.
  Select the optimum aspect ratio. (page 33)

**POSITION THE IMAGE**

When setting up the projector for the first time or setting up at a new place, you must perform the following operations.

1 **Adjust the vertical angle of the projector.**
   - Place the projector at the right angle from the screen.

   ![Diagram showing how to adjust the vertical angle of the projector]

   - Press the leg adjuster button and adjust the vertical projection angle. Then, adjust the projected image to the center of the screen.

   ![Diagram showing the leg adjuster]

2 **Adjust the projection size and focus.**
   - Turn the zoom and focus rings to adjust the projected image.

   ![Diagram showing the zoom and focus rings]

**NOTE:**
- When you adjust the zoom after adjusting the focus, you may need to adjust the focus of the image again.
- If the projected image slants to the right or left, turn the rear leg adjuster to adjust the angle of the projector.
- If keystone distortion occurs, see KEYSTONE. (page 32)
Remote control operation

![Remote Control Image]

**Remote control operation**

**CAPTURE AN IMAGE**

You can freeze the projected image and temporarily stop the sound, regardless of the playing condition of the connected device.

FREEZE

Press the button again to cancel it. The image is distorted momentarily when the projection is stopped and restarted.

**STOP THE PROJECTION TEMPORARILY**

You can temporarily stop the projection and the sound from the projector.

AV

MUTE

Press the button again to cancel it.

**SWITCH THE INPUT SIGNAL**

You can switch the input signal to be projected.

**COMPUTER**

The options below are displayed each time you press this button.

<table>
<thead>
<tr>
<th>COMPUTER1</th>
<th>Signal input to COMPUTER1 IN terminal</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMPUTER2</td>
<td>Signal input to COMPUTER2 IN terminal</td>
</tr>
</tbody>
</table>

**VIDEO**

The options below are displayed each time you press this button.

<table>
<thead>
<tr>
<th>S-VIDEO</th>
<th>Signal input to S-VIDEO IN terminal</th>
</tr>
</thead>
<tbody>
<tr>
<td>VIDEO</td>
<td>Signal input to VIDEO IN terminal</td>
</tr>
</tbody>
</table>

You can confirm the selected input terminal (from the graphical input terminal guide on the upper right of the screen), if INPUT GUIDE (DISPLAY OPTION ➔ ON-SCREEN DISPLAY menu) is set to DETAILED. (➔ page 35)

You can change the input with [▲▼◄►]. It may take some time to change the image after the input signal is switched.

**NOTE:**
- Input a compatible signal shown in the “LIST OF COMPATIBLE SIGNALS”. (➔ page 52)
- For the input terminals, see “Connections”. (➔ page 18)
- The input guide automatically disappears when it is left idle.

Press [INPUT SELECT] on the control panel to switch the input in the following order. (➔ page 13)

COMPUTER1 ➔ COMPUTER2

VIDEO ➔ S-VIDEO

**SET UP THE IMAGE POSITION AUTOMATICALLY**

The projector automatically adjusts the SHIFT, DOT CLOCK and CLOCK PHASE when an RGB signal is input.

**NOTE:**
- The SIGNAL SEARCH will be in operation when it is set to ON. (➔ page 37)
- If the dot clock frequency is higher than 162 MHz, DOT CLOCK and CLOCK PHASE cannot be adjusted automatically. (➔ page 32, 33)
- If the projected signal or image is too dark or blurred around the edge, AUTO SETUP may stop the process before completing the adjustment or adjust abnormally. Project a much clearer or lighter image and try again.
Remote control operation (continued)

RESET TO FACTORY DEFAULT SETTINGS

You can reset most of the customized settings to the factory default settings.

DEFAULT

For details, see “Reset to factory default settings”. (→ page 28)

CONTROL SPEAKER VOLUME

You can control the volume of the built-in speakers and output audio sound.

+ : increases the volume
- : decreases the volume

PROJECT AN IMAGE USING INDEX-WINDOW

You can split a projected image into 2 windows using INDEX-WINDOW. One frozen image is stored in memory and displayed on the left side of the screen. Projection continues for the other image on the right side.

INDEX-WINDOW display

To capture a new image and change the size in 3 ways.

By default, the frozen image is displayed on the left and the subsequent image is displayed on the right.

To switch the position.

Frozen image
Continuing image

Frozen image
Continuing image

Frozen image
Continuing image

Frozen image
Continuing image

NOTE:
• The aspect ratio of the image is changed and becomes vertically elongated.
• If you change the window size, the aspect ratio of the image is changed. (→ page 33)
• While in INDEX-WINDOW mode, press [ENTER] to capture a new image and the frozen image’s window will be updated.
• When capturing a quick moving picture, repeat several times to get a stable picture.

Press [RETURN] to escape.
Remote control operation (continued)

**ENLARGE THE IMAGE**

You can enlarge the projected image to the center position by emphasizing within the range of 1× to 2×.

Press [RETURN] or [MENU] to escape.

[DIGITAL ZOOM] button operation

+ button: zooms in

- button: zooms out

Press “-” (STANDARD)

Press “+” (MAXIMUM)

Press “▲▼«»” to shift the center point.

NOTE:
- When the COMPUTER signal is input, if FRAME LOCK in the POSITION menu is OFF, enlargement range is 1× to 3×.
- When the COMPUTER signal is input, if FRAME LOCK in the POSITION menu is ON, enlargement range is 1× to 2×.
- When another signal is input, the enlargement range is from 1× to 2× by 0.1.
- DIGITAL ZOOM mode is canceled when the input signal is changed.
- During DIGITAL ZOOM mode, [AUTO SETUP], [FREEZE], [DEFAULT], [INDEX-WINDOW] and [FUNCTION] (except when AV MUTE is assigned) buttons are not available.
- The image is distorted momentarily when the image is zoomed.

**USE AN ASSIGNED FUNCTION**

You can select a useful function from the list and assign it to [FUNCTION] button as a shortcut.

FUNCTION

To display the on-screen menu (main menu, sub-menu or detailed menu).

For the menu operation, see “OPERATE THE MENU”. (☞ page 28)

When not using the [FUNCTION] button

1. Select DISABLE in FUNCTION BUTTON (PROJECTOR SETUP menu).

2. Press [ENTER].

3. Select OK.

4. Press [ENTER].

NOTE:
- For details, see FUNCTION BUTTON in PROJECTOR SETUP menu. (☞ page 40)
Menu operation

**OPERATE THE MENU**

Depending on the selected input signals, some items and functions may not be adjusted or available. Some can be adjusted without any signals.

1. Select the main menu item.

2. Select the sub-menu item.

3. Press buttons to scroll to the required sub-menu item and press buttons or the ENTER button to adjust.

The selected menu is called up while other menu items disappear from the screen.

**NOTE:**

- Press [MENU] or [RETURN] to return to the previous menu. Press repeatedly to exit from the menu mode and return to the projection.
- Called up item will disappear after 5 seconds without any operation and return to the menu mode.
- For the sub-menu items, see “SUB MENU” in the ON-SCREEN MENU (page 29).

**Reset to factory default settings**

**DEFAULT**

During sub-menu screen display:
The items of the sub-menu currently displayed are reset to the factory default settings.

During called-up item screen display:
Only the item adjusted currently is reset to the factory default setting.

**NOTE:**

- You cannot reset all the settings at one time to the factory default settings.
- For resetting all the settings, see INITIALIZE ALL (PROJECTOR SETUP menu). (page 41)
- Not all menu items can be reset by pressing [DEFAULT]. Adjust each menu item manually.

**ON-SCREEN MENU**

You can access other functions from operating this menu by referring to “OPERATE THE MENU.”

The ON-SCREEN MENU displayed consists of the main menu and sub-menu.

Menu operation (continued)

- **COLOR**
  You can adjust the color saturation of the projected image. (For S-VIDEO/VIDEO/RGB (Moving image)/YPbPr input signal only)
  
  ![Lighter to Darker Arrow]

- **TINT**
  You can adjust the skin tone of the projected image. (For S-VIDEO/VIDEO/RGB (Moving image)/YPbPr input signal only)

  ![More reddish to More greenish Arrow]

- **SHARPNESS**
  You can adjust the sharpness of the projected image.

  ![Less sharp to More sharp Arrow]

  **NOTE:**
  - The adjustable range depends on the input signal.

- **WHITE BALANCE**
  You can adjust the white balance in 3-color temperature. (For RGB (Still image) input signal only)

  ![Advanced menu item] (Default)
  
  | WHITE BALANCE RED | 0 |
  | WHITE BALANCE GREEN | 0 |
  | WHITE BALANCE BLUE | 0 |

- **COLOR TEMPERATURE**
  You can adjust the white balance of the projected image.

  ![Change setting Arrow]

  **DEFAULT** | Balanced white
  --- | ---
  **HIGH** | More bluish
  **LOW** | More reddish

- **DAYLIGHT VIEW**
  You can keep the projected image bright and vivid even in well-lit rooms where the ambient light sources cannot be controlled.

  ![Change setting Arrow]

  **NOTE:**
  - Do not cover the Ambient Luminance Sensor(ALS) of the projector, otherwise the AUTO mode may not function properly.
  - AUTO is not available when INSTALLATION in PROJECTOR SETUP menu is set to REAR/DESK or REAR/CEILING.

- **NOISE REDUCTION**
  You can switch the automatic noise reduction system on/off. (For S-VIDEO/VIDEO input signal only)

  ![Change setting Arrow]

  **NOTE:**
  - If NOISE REDUCTION is set active when the selected input signal has less noise, the image may look different from the true image. If so, set to OFF.

- **TV-SYSTEM**
  Switch the setting manually to match the video data. (For S-VIDEO/VIDEO input signal only)

  ![Change setting Arrow]

  **NOTE:**
  - AUTO mode is selected by default.
  - When the projector is not working properly in AUTO mode, change the setting according to each TV system type.
  - AUTO setting will automatically select the compatible signal from NTSC/NTSC 4.43/PAL/PAL60/PAL-M/PAL-N/SECAM.
Menu operation (continued)

RGB/YPbPr

(For RGB/YPbPr input signal only)
Select the signals to be input to the COMPUTER 1 IN and COMPUTER 2 IN terminals.

<th>Change setting</th>
</tr>
</thead>
</table>

| AUTO | Automatic adjustment |
| RGB | For RGB signals |
| YPbPr | For YPbPr signals |

NOTE:
- AUTO mode is selected by default.
- Select RGB or YPbPr according to the input signal if the image is not normally projected during AUTO mode.

The function only becomes effective when certain signals are input:
(VGA60, 480i, 576i, 480p, 576p, 1080/60i, 1080/60p, 1080/50i, 1080/50p, 720/60p, 720/50p)

KEYSTONE

If you need to correct the angle of the projection even when the REALTIME KEYSTONE is activated, you can correct the keystone manually.

Image

Operation

NOTE:
- You can correct the distortion ±30 ° from the plane.
- For a better image quality, install the projector to minimize distortion.
- The result of the keystone correction will affect the aspect ratio and the size of the image.
- The image is distorted momentarily when the keystone is corrected.

POSITION MENU

Remote control

Control panel

Set the selected item with [▲▼►◄].

REALTIME KEYSTONE

If the projector is aligned non-perpendicularly to the screen, or if the projection screen has an angled surface; the keystone will be automatically corrected.

<table>
<thead>
<tr>
<th>Change setting</th>
<th>Change setting</th>
</tr>
</thead>
</table>

| OFF | Deactive |
| ON | Active |

NOTE:
- If the detected tilt of the main unit is ± 5 %, even if you set ON, the distortion will not be corrected automatically. Because the priority is not to correct the distortion, but to avoid the image quality deteriorated by correcting.
- If you need to correct the keystone, you can correct the distortion manually by adjusting the KEYSTONE.

SHIFT

Horizontal (H): Press [◄►] to move the image horizontally.

Vertical (V): Press [▲▼] to move the image vertically.

NOTE:
- This function can be adjusted by pressing the ►◄▲▼ buttons directly.

DOT CLOCK

If there are interference patterns on the projected image (referred as moire or noise), minimize it by pressing [◄►] to adjust the clock frequency. (For RGB (Still image) input signal only)

NOTE:
- DOT CLOCK needs to be adjusted before adjusting the CLOCK PHASE.
Menu operation (continued)

CLOCK PHASE

If you require further adjustment for the same reason as the DOT CLOCK adjustment, you can further adjust the timing of the clock. (For RGB/YPsbPr input signal only) Press ◄► buttons to adjust.

NOTE:
- If the projecting signal’s dot clock frequency is higher than 162 MHz, adjusting DOT CLOCK or CLOCK PHASE may not make any difference. Refer to “LIST OF COMPATIBLE SIGNALS”. (☞ page 52)

OVER SCAN

Use this function when characters or pictures are cropped near the periphery of the projected image. (For S-VIDEO/VIDEO/RGB (Moving image)/YPbPr input signal only)

Zoom out → Zoom in

Setting range: 0 to +3

ASPECT

You can manually switch to the desired aspect ratio. Selectable options vary according to input signal.

Change setting ◄► Change setting

AUTO 4:3 16:9
THROUGH H FIT
S4:3 HV FIT V FIT

NOTE:
- AUTO mode is displayed only when NTSC/480i signal is input.
- THROUGH mode is displayed only for certain signals.
- For the wide signal*, the aspect ratio option cycles through 16:9 ↔ V FIT ↔ HV FIT.

AUTO (For NTSC/480i input signal only)

The signal which contains an identifying signal will be detected and will automatically project the image in the most optimal aspect setting.

4:3

Standard input signal*1 → projection is 4:3 aspect ratio.

Input signal: XGA

Image:

16:9

Standard input signal*1 → projection is 16:9 aspect ratio.

Wide input signal*2 → projection is the current aspect ratio.

Input signal: 1 080/60i

Image: Panel:

H FIT

Standard input signal*1 → projection without changing the aspect ratio uses all the panel pixels in the horizontal direction to crop the top and bottom of the image.

Input signal: SXGA

Image:

*1 A standard signal has an aspect ratio of 4:3 or 5:4.
*2 A wide signal has an aspect ratio of 16:10, 16:9 or 15:9.
**Menu operation (continued)**

**V FIT**
Wide input signal*2 → projection without changing the aspect ratio uses all the panel pixels in the vertical direction to crop the right and left of the image.

Input signal: 1 080/60i

![Panel](image)

**HV FIT**
The image is projected all over the panel pixels (screen). The input signal is projected at the aspect ratio of the panel screen.

Input signal: 1 080/60i

![Panel](image)

**S4:3**
Standard input signal*1 → the input signal will be sized down 75% and projected. S4:3 mode is effective when projecting 4:3 image onto a 16:9 screen.

Input signal: XGA

![Panel](image)

*1 A standard signal has an aspect ratio of 4:3 or 5:4.

*2 A wide signal has an aspect ratio of 16:10, 16:9 or 15:9.

**THROUGH**
The image will be projected without any size adjustment. This function can be set when the input signal is smaller than the number of the LCD panel pixels (1024 x 768).

Input signal: NTSC

![Panel](image)

**NOTE:**
- When a 4:3 image is projected to a 16:9 screen, the image may be distorted or some portions may be cropped. Select an aspect ratio (4:3) which retains the creator’s intended image.
- The order of ASPECT types is defined not only by the input method but also by the input signals.
- If you project an enlarged or distorted copyrighted image using the ASPECT function for commercial use in a public place, you might infringe the copyright of the creator which is protected by the copyright law.

**FRAME LOCK**
If the projected image is bad, you can activate FRAME LOCK for synchronization. (For RGB input signal only)

<tr>
<td>ON</td>
<td>Projector starts immediately</td>
</tr>
</tbody>
</table>

### INSTALLATION
When installing the projector, select the projection method according to the projector’s position. (☞ page 17)

- **Change setting**

### HIGH ALTITUDE MODE
If you use the projector at high elevation, the **HIGH ALTITUDE MODE** setting need to be **ON** to set the fan speed to high.

- **Change setting**

<table>
<thead>
<tr>
<th>OFF</th>
<th>Use in normal environment (below 1 400 m (4 593 ft) above sea level)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ON</td>
<td>Use at high altitude (at 1 400 m – 2 700 m (4 593 - 8 858 ft) above sea level)</td>
</tr>
</tbody>
</table>

**NOTE:**
- The loudness of fan noise depends on the **HIGH ALTITUDE MODE** setting.

### STANDBY MODE
You can change the standby mode setting.

- **Change setting**

<table>
<thead>
<tr>
<th>ECO</th>
<th>The standby power is reduced to 0.4 W to save power</th>
</tr>
</thead>
<tbody>
<tr>
<td>NORMAL</td>
<td>The power of the projector can be turned <strong>ON</strong> and the audio output can be set active by controlling the computer connected via wired LAN in standby mode</td>
</tr>
</tbody>
</table>

### LAMP POWER
You can adjust the power of the lamp to save electricity and reduce the noise.

- **Change setting**

<table>
<thead>
<tr>
<th>NORMAL</th>
<th>When higher luminance is required</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO</td>
<td>When lower luminance is sufficient</td>
</tr>
</tbody>
</table>

**NOTE:**
- This function is disabled when no input signal is detected.
- **ECO** setting is recommended when higher luminance is not required such as in a small room.
### Menu operation (continued)

#### LAMP RUNTIME
You can check how long the lamp has been used.

**NOTE:**
- **LAMP RUNTIME** is important for lamp replacement timing. See “REPLACE THE LAMP UNIT”. (⇒ page 47)
- Check the lamp unit replacement time. (⇒ page 47)
- If the lamp runtime has reached 3,800 hours, the red (time indicator) and gray marks appear alternately to notify you of the lamp replacement time.
- The lamp life varies depending on the usage condition (number of power-on times, etc.).

#### EMULATE
When the projector is controlled by a computer through serial input terminal, you can change the setting to use the former projector control commands.

1. To select the required setting.
2. To display the on-screen menu (main menu, submenu or detailed menu).
3. Press and hold for at least 3 seconds.

#### FUNCTION BUTTON
You can select a useful function from the list and assign it to [FUNCTION] button as a short-cut.

**NOTE:**
- The text and button color will change once the setting has completed.

#### AUDIO SETTING
You can perform detailed setting for Audio.

### VOLUME
You can adjust the volume of the built-in speakers and audio output sound.

- Press for at least 3 seconds.

### BALANCE
You can adjust to listen to the sound played equally from both right and left external stereo speakers, or adjust the balance so that more sound plays from either the left or right side.

TEST PATTERN
You can use the 7 different test patterns to adjust the focus of the image.

To display the test pattern.

Press [MENU] or [RETURN] to return to the PROJECTOR SETUP menu, or press repeatedly to escape the menu mode.

NOTE:
- The initial screen is an all white pattern. Only when TEST PATTERN is assigned to the [FUNCTION] button, the lattice pattern will be displayed as the initial screen.

INITIALIZE ALL
You can reset all of the customized settings in MENU to the factory default.

- If the [ENTER] is pressed in the INITIALIZE ALL menu, “INITIALIZE ALL” will be displayed. Select OK and press [ENTER]. “NOW INITIALIZING...” is displayed followed by “POWER OFF” display. Select OK and turn the power off according to the instruction. (All other buttons are deactivated.)
- The LANGUAGE and INITIAL SETTING menu screen will be displayed when the power is connected. (☞ page 12)

NOTE:
- The usage time of the projector, lamp runtime and the NETWORK settings will not be initialized.
- When PASSWORD in SECURITY menu is activated, ensure to enter the correct password when initializing.
- After INITIALIZE ALL operation is completed, the password is reset to the factory default setting and PASSWORD setting is turned OFF.

IN STANDBY MODE
You can turn ON or OFF the audio output in standby mode.
Menu operation (continued)

SECURITY MENU

Remote control  |  Control panel

</tbody>
</table>

REMOTE CONTROLLER

<table>
<thead>
<tr>
<th>ENABLE</th>
<th>Enable the button operations</th>
</tr>
</thead>
<tbody>
<tr>
<td>DISABLE</td>
<td>Disable the button operations</td>
</tr>
</tbody>
</table>

NOTE:
• If DISABLE is selected and [ENTER] is pressed, the confirmation screen appears. Select OK and press [ENTER].
• If any button is pressed after CONTROL PANEL is set to DISABLE, the password screen appears. Input the password which is set in the SECURITY menu. (If no operation is done, the password screen disappears in 10 seconds.)
• If you set both CONTROL PANEL and REMOTE CONTROLLER to DISABLE, all buttons’ operations of the control panel and remote control are disabled and you cannot turn off the power.

How to clear DISABLE:
During the standby mode or projection, press and hold [ENTER] and [MENU] for at least 2 seconds, and CONTROL PANEL is set to ENABLE.

Change the setting of REMOTE CONTROLLER with the control panel.

NETWORK MENU

<table>
<thead>
<tr>
<th>Remote control</th>
<th>Control panel</th>
</tr>
</thead>
</table>

Set the selected item with [➡].

NOTE:
• These items are set for network connection with a computer. For details of the PJ Link and network, see “Network Operation Manual”.

WIRED LAN
You can set up a wired LAN.

NAME CHANGE
You can change the name of the projector.

NETWORK CONTROL
When controlling the projector with a computer on the network, you must turn this function ON.

STATUS
You can display the status of the network setting.

INITIALIZE
You can reset the settings of the network to the factory default settings.

NOTE:
• If PASSWORD (SECURITY menu) is activated, when the network setting is initialized, you will be required to input the password.
LAMP and TEMP indicators

The LAMP and/or TEMP indicators will light up to indicate that the projector has some problems.

NOTE:
• Make sure to turn off the power (see “TURN THE PROJECTOR OFF” on page 23) and confirm the power supply status with the POWER indicator. (→ page 21)

Manage the problem as follows:

### LAMP INDICATOR

<table>
<thead>
<tr>
<th>Indicator</th>
<th>• Illuminating red</th>
<th>• Flashing red</th>
</tr>
</thead>
<tbody>
<tr>
<td>Problem</td>
<td>LAMP RUNTIME has reached 3 800 hours.</td>
<td>LAMP circuit failure, abnormal function or the lamp unit is damaged.</td>
</tr>
<tr>
<td>Cause</td>
<td>Lamp unit will run out soon and needs to be replaced.</td>
<td>The projector is turned on again too soon.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>LAMP circuit failure, abnormal function.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Lamp unit is damaged.</td>
</tr>
<tr>
<td>Remedy</td>
<td>See “REPLACE THE LAMP UNIT”. (→ page 47)</td>
<td>Let the lamp unit cool down and turn on the projector after 90 seconds.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Turn the projector off (→ page 23) and contact an Authorized Service Center.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>See “REPLACE THE LAMP UNIT”. (→ page 47)</td>
</tr>
</tbody>
</table>

NOTE:
• If the LAMP indicator still lights or flashes after the above remedy, contact an Authorized Service Center.

### TEMP INDICATOR

<table>
<thead>
<tr>
<th>Indicator</th>
<th>• Illuminating red while projecting and the alert will be displayed.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Flashing red and power is turned off.</td>
</tr>
<tr>
<td>Problem</td>
<td>The temperature inside and/or outside the projector is abnormally high.</td>
</tr>
<tr>
<td></td>
<td>• The projection may become darker than usual.</td>
</tr>
<tr>
<td></td>
<td>• The internal fan’s operational noise may be louder than usual.</td>
</tr>
<tr>
<td>Cause</td>
<td>The air outlet port and air intake ports are covered.</td>
</tr>
<tr>
<td></td>
<td>The room temperature is too high.</td>
</tr>
<tr>
<td></td>
<td>The filter is excessively dirty and the ventilation is poor.</td>
</tr>
<tr>
<td></td>
<td>The projector is located at 1 400 - 2 700 m (4 593 - 8 858 ft).</td>
</tr>
<tr>
<td>Remedy</td>
<td>Remove object(s) from the air outlet port and air intake ports or clear around the projector.</td>
</tr>
<tr>
<td></td>
<td>Reinstall the projector in temperature controlled place. (→ page 56)</td>
</tr>
<tr>
<td></td>
<td>Clean the filter in a proper method. (→ page 46)</td>
</tr>
<tr>
<td></td>
<td>Turn on the projector*1 and set the HIGH ALTITUDE MODE to ON. (→ page 39)</td>
</tr>
</tbody>
</table>

*1 The projector will operate for 2 minutes with OFF set at high elevation.

NOTE:
• Perform the above remedy; disconnect the power plug, and then supply the power again. If the TEMP indicator still lights or flashes after the above remedy, contact an Authorized Service Center.
• If temperature in the projector rises, the fan speed increases and the sound becomes louder.
Care and replacement

Preparations

Before cleaning, be sure to turn off the power and disconnect the power plug from the wall outlet.
(☞ page 20, 23)

CLEANING THE PROJECTOR

Cabinet

Wipe off dirt and dust gently with a soft cloth.
- If it is difficult to remove the dirt, wipe the projector with a damp cloth. Dry off the projector with dry cloth.
- Do not use petroleum benzine, thinner, any alcoholic solvent, kitchen detergents or chemical cloths. Failure to observe these may result in altered or damaged surfaces of the projector.

Projector lens

Make sure no dirt or dust remains on the surface of the projector lens glass. It will be enlarged and projected onto the screen.
Wipe off dirt and dust gently with a lint-free cloth. Do not wipe the projector lens with a cloth which has collected dust.

NOTE:
- Clean the projector lens with special care.

Air filter

If the air filter is excessively dirty, the internal temperature of the projector increases, the TEMP indicator lights, and the power is turned off.
If the power is turned off, the TEMP indicator flashes.
Clean the air filter regularly every 100 hours of usage.

1 Remove the air filter.
   While pressing the tab of the air filter, pull the air filter open slowly.

2 Clean the air filter.
   Vacuum dirt and dust from the air filter.

3 Install the air filter.
   Install in the reverse order to 1).

NOTE:
- Do not use the projector without attaching the air filter. Otherwise, it will suck in dirt and dust which can cause malfunction.
- The TEMP indicator may flash because of clogging within 100 hours, depending on the using environment. In that case, clean the air filter at shorter intervals.
**REPLACE THE LAMP UNIT**

**Air filter**

The air filter should be replaced when cleaning is ineffective and when replacing the lamp unit. A replacement air filter is provided with a replacement lamp unit (ET-LAB2). Contact an Authorized Service Center for the air filter (TXFKN01VKN5).

**Lamp unit**

The lamp unit, ET-LAB2 is consumable and you must replace it regularly. It is recommended that a qualified technician carry the lamp unit replacement. Consult with an Authorized Service Center.

**Note on lamp unit replacement**

- Handle the lamp unit with special care as the lamp is made of glass. Dropping or giving it a shock may cause it to burst or damaged.
- The lamp contains mercury. If you wish to discard the used lamp, please contact your local authorities or dealer and ask for the correct method of disposal.
- Prepare a Phillips-head screwdriver.
- When replacing the lamp unit, be sure to hold it by the handle.
- Hold the lamp unit horizontally to prevent broken pieces from scattering.
  When the projector is mounted in the ceiling, do not work directly under the projector or put your face close to the projector.
  Pull out the lamp vertically.

**NOTE:**

- Prior to replacing the lamp unit, allow it to cool down to prevent the risk of burns, damage and other hazards.
- Do not attempt replacement of an unauthorized lamp unit.
- The model Nos. of the accessories and the parts sold separately are subject to change without notice.

**Lamp unit replacement time**

When the lamp has expired, the brightness may decrease over time. 4 000 hours of use is a rough guide of the replacing time and that might be shortened due to usage conditions, specifications of the lamp unit or environmental conditions. You can check the duration of usage time by checking LAMP RUNTIME in the PROJECTOR SETUP menu. Do not use a lamp unit over 5 000 hours. Failure to observe this may result in explosion of the lamp.

<tr>
<td>Display “REPLACE LAMP” at the upper left of the screen, and it will stay until you respond. The power is turned off automatically in 10 minutes.</td>
<td></td>
</tr>
</tbody>
</table>

**NOTE:**

- The guide time, 4 000 hours, is a rough estimate based on certain conditions and is not a guaranteed time.
Care and Replacement (continued)

Lamp replacement procedure

- When the projector is mounted in the ceiling, do not work directly under the projector or put your face close to the projector.
- Be sure to install the lamp unit and attach the lamp unit cover securely.

1. Disconnect the power plug from the wall outlet according to “TURN THE PROJECTOR OFF” (page 23), wait for at least 1 hour and check the bottom if the lamp unit has cooled.

2. Use a Phillips-head screwdriver to loosen the lamp unit cover screw on the back of the projector until the screw loosens and remove the lamp unit cover.

3. Use a Phillips-head screwdriver to loosen the 2 lamp unit screws. Pull the used lamp unit gently from the projector.

4. Press in the lamp unit until it clicks and make sure the unit is installed securely. Tighten the 2 lamp unit screws securely with a Phillips-head screwdriver.

   During insertion, particularly press the A portion securely.

5. Attach the lamp unit cover and tighten the 1 lamp unit cover screw securely with a Phillips-head screwdriver.

6. Connect the power cord to a wall outlet.

NOTE:
- If INITIAL START UP in the PROJECTOR SETUP menu is set to ON, the projector starts projecting when the power cord is connected to a wall outlet. (page 39)

8. To display the main menu.

To scroll to the PROJECTOR SETUP menu.
9

To select the PROJECTOR SETUP menu.

To select LAMP RUNTIME.

10

Press and hold for approximately 3 seconds.

11

After the lamp goes off, projection stops and the [POWER] button on the main unit lit red. Disconnect the power plug. The lamp runtime has been reset to “0”.

NOTE:
- If any button other than the [POWER] is pressed, the LAMP RUNTIME screen disappears and the lamp runtime is not reset. (Repeat from step 8 again).

Ceiling mount bracket safeguards

- Installation work of the ceiling mount bracket should only be carried by a qualified technician.
- Even if it is during guaranteed period, the manufacturer is not responsible for any hazard or damage caused by using a ceiling mount bracket which is not purchased from an authorized distributors, or environmental conditions.
- Remove an unused ceiling mount bracket promptly.
- Ensure to use a torque driver and do not use an electrical screwdriver or an impact screwdriver.
- For details, see the work instruction manual packed together with the ceiling mount bracket.
- The model Nos. of the accessories and the parts sold separately are subject to change without notice.

Model No. of ceiling mount bracket: ET-PKB2

M4 × 0.7 Torque: 1.25 ± 0.2 N.m
# Troubleshooting

Confirm the following problem and cause. If the suggested solutions do not solve the problem, contact an Authorized Service Center.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Cause</th>

</table>
| Power does not turn on. | ● The power cord may not be connected securely.  
● No electric supply at the wall outlet.  
● The circuit breakers have tripped.  
● **TEMP** or **LAMP** indicator is lit or flashes.  
● The lamp unit cover has not been securely installed.  
● **CONTROL PANEL** in the **PROJECTOR SETUP** menu is invalidated. | 20 |
| No picture appears. | ● The lens cover is not removed.  
● The input terminal may not be connected properly.  
● The input selection setting may not be correct.  
● The **BRIGHTNESS** adjustment setting may be at the minimum setting.  
● The signal input source may not be operating properly.  
● The **AV MUTE** function may be in use. | 18, 19, 24, 30, 25 |
| The picture is fuzzy. | ● The lens focus may not have been set correctly.  
● The projector may not be at the correct distance from the screen.  
● The lens may be dirty.  
● The projector may be tilted too much. | 24 |
| Color is pale or grayish. | ● **COLOR** or **TINT** adjustment may be incorrect.  
● The input source which is connected to the projector may not be adjusted correctly. | 31 |
| No sound can be heard from the internal speaker. | ● The audio signal source may not be connected properly.  
● The volume adjustment may be at the lowest possible setting.  
● A cable may be connected to the **AUDIO OUT** terminal. | 18, 19, 26, 40 |
| The remote control does not operate. | ● The batteries may be weak.  
● The batteries may not have been inserted correctly.  
● The remote control signal receptor on the projector may be obstructed.  
● The remote control unit may be out of the operation range.  
● **REMOTE CONTROLLER** in the **PROJECTOR SETUP** menu is invalidated.  
● The remote control is under a strong light such as fluorescent. | 15, 15, 15, 44 |
| The control buttons of the projector do not operate. | ● **CONTROL PANEL** in the **PROJECTOR SETUP** menu is invalidated. (If you have a loss of the remote control while the **CONTROL PANEL** is invalidated, press and hold [MENU] for 2 seconds by pressing [ENTER].) | 44 |
| The picture does not display correctly. | ● The signal format (**TV-SYSTEM**, **RGB/YPbPr**) may not have been set correctly.  
● There may be a problem with the VCR or other signal source.  
● A signal which is not compatible with the projector is being input. | 31, 32 |
| Picture from a computer does not appear. | ● The RGB signal cable is too long. (Limit to 10 m (32’ 10”).)  
● The external video output from a laptop computer may not be correct. (You may be able to change the external output settings by pressing the [Fn] + [F3] or [Fn] + [F10] keys simultaneously. The actual method varies depending on the type of computer; refer to the documentation provided with your computer for further details.) | 36, 52 |
| The projector cannot be controlled through serial terminal. | ● **EMULATE** in the **PROJECTOR SETUP** menu is not set correctly. (If you fail to select your product series, ask your dealer for repair.) | 40 |

*1 The "i" appearing after the resolution indicates an interlaced signal.

*2 The following symbols are used to indicate picture quality.

- **AA**: Maximum picture quality can be obtained.
- **A**: Signals are converted by the image processing circuit before picture is projected.
- **B**: Some loss of data occurs to make projection easier.
- **O**: The signals marked with circles (O) can be applied by plug-and-play device.

References
SERIAL TERMINAL

The serial connector which is on the connector panel of the projector conforms to the RS-232C interface specifications. The projector can be controlled by a personal computer which is connected to this connector.

</table>

The data streaming from the computer will start with STX, and proceed to Command, Parameter and end with ETX. You can add the required parameter.

NOTE:
- The projector cannot receive any command for 10 seconds after the lamp is switched on. Wait for 10 seconds before sending the command.
- For multiple commands, check the projector if the response has been sent for one command before sending the next command.
- When a command which does not require parameters to be sent, the colon (:) is not required.
- If an incorrect command is sent from the personal computer, an ER401 command will be sent from the projector to the personal computer.

**4** Average value. Each product has an individual variability in weight.

**5** The model Nos. of the accessories and parts sold separately are subject to change without notice.
**Removal of spacer at rear adjuster**

- Remove the spacer before use.

**NOTE:**
Keep the spacer away from babies and infants.
- If a baby swallows the spacer by accident, it may be affected badly.
- If a baby seems to have swallowed the spacer, consult the doctor immediately.
