Only a qualified installer should install this product.
Read these instructions carefully before installing the ET-RFD21 projector frame.

These installation instructions must always be handed over to the installing person.
Dear customer,

Thank you for choosing the ET-RFD21 frame for Panasonic DLP® based projectors. This instruction booklet provides you with all the necessary operating information that you may require. It will help you to get the best performance out of this new product. We hope you will be pleased with your Panasonic projector frame.

Model number: **ET-RFD21**

**SAFETY PRECAUTIONS**

This frame is BGV-C1 certified

**WARNING**

Installation work should only be carried out by a qualified technician.
- If this product is not installed correctly, serious accidents may result.

Do not place the projector on top of unstable surfaces.
- If the projector is placed on top of a surface which is sloped or unstable, it may fall down or tip over and injury or damage could result.

Make sure not exceed max. weight loads for ceiling mounts.
- For suspended installations, use only designated hanging accessories, like TH-SHORTY-150-8 for a max. weight load of 150 kg (330.69 lbs).

**CAUTION**

Do not install the frame in a place which may impede projector ventilation.
- If this is not observed, fire may result.

Do not set up the projector in humid or dusty places or in places where the projector may come into contact with oily smoke or steam.
- Using the projector under such conditions may result in fire, electric shocks or plastic deterioration.

Minimum 2 people are required to install the frame.
- With regard to the overall weight of all necessary installation devices, make sure to handle those with at least two people.

Place the frame on the projector so that it is aligned with the screw hole positions. (Make sure that the forward/back direction is correct when installing. If the direction is reversed, the hole positions will not match up.)

Please make sure to use ONLY the correspondent screw holes when installing a projector!

Secure the projector to the frame using the six screws (M6x30) and the twelve flat washers (M6). Do not forget to use the washers as they are responsible for the galvanic isolation.

Torque: 4 ± 0.5 Nm
Please use the enclosed steel wire to secure the projector in the frame by drawing the wire around the securing bar (1) of the projector as shown in image 1.

Fix both end latches with the enclosed carabiner. Please make sure that the steel wire clasps the securing bar of the projector (1) and the steel bar of the frame (2). The carabiner screw must be tightly fastened!
INSTALLING TANDEM PROJECTIONS

Place the upper projector with frame on top of the lower projector also in frame. Make sure the four male location bolts enter into the correspondent female location bolts. To secure, draw the locking pin through both bolts.
